REPORT OF THE TRUSTEE TO THE UNITHOLDERS FOR THE YEAR ENDED 31ST MARCH, 2010

Dear Unitholder,

It gives us great pleasure to enclose schemewise audited financials as on 31st March, 2010. This Report is in continuation of the 'Performance and Portfolio of the Schemes' Report as on 31st March, 2010 published by us earlier.

1. Scheme Performance, Future Outlook and Operations of the Schemes

The year that was:

Debt:

The global economy after suffering one of the worst recessions in FY 2008-2009, started to recover in FY 2009-2010, on the back of massive stimulus by governments across the major economies. However, compared to developed economies, the emerging economies fared well. The GDP growth in India, which had slumped to 6.7% during 2008-2009, grew by 7.4% in FY 2009-10.

The financial market during 2009-10 was characterised by prevalence of comfortable liquidity conditions in money markets despite large government borrowing programme and rising pressure on medium to long-term government bond yield on the back of rising inflationary pressure.

During the year the headline Wholesale Price Index (WPI) inflation, firmed up significantly. While the initial inflationary pressure was largely due to rising food and fuel prices, reflecting the impact of a deficient monsoon on agricultural output and the increase in international crude prices, in the second half of the year, the inflation became increasingly generalized due to persistent supply side pressures. This was evident from the acceleration of inflation in non-food manufactured products from -0.4% in November 2009 to 4.7% in March 2010. These inflationary conditions, coupled with the stronger growth, forced RBI to reverse the accommodative monetary policy. RBI started the reversal of its accommodative policy by hiking CRR by 75 basis points and Repo and Reverse Repo by 25 basis points in Q4 of FY 2009-10.

During the year due to ample liquidity, the call rate hovered around the lower range of the Liquidity Adjustment Facility (LAF) corridor throughout the year. However, longer end of the yield curve continued to shift upwards indicating market concerns of fiscal deficit and rising inflationary pressures. While the medium to long-term bond yields, in general, moved up during the year, reflecting inflation and fiscal deficit concerns, the short-term yield softened till Q3 of 2009-10, reflecting the surplus liquidity conditions, followed by a hardening trend in Q4 as the surplus liquidity reduced and there was a general shift in the interest rate environment. The benchmark 10 year yield which was at 7.01% at the beginning of the year touched at high of 8% in Q4 of 2009-10, before closing at 7.84% towards the end of the year. The corporate bonds were stable, with 5 year AAA yield averaged around 8.25% and closed the year at 8.55%. However, the spread between the 5 Year AAA bond, which had hit a high of around 400 bps at the height of credit crisis in FY2008-09, narrowed down considerably to close the year at 101 bps,.

Tata Floating Rate Fund – Long Term Plan:

Underperformed due to small size of corpus resulting in inflexibility to make investments in odd lots and higher impact cost.

Performance at a glance (% as on 31st March, 2010)

	Last 1 year	Last 3 years	Last 5 years	Since Inception
Tata Floating Rate Fund				(22/12/03)
Long Term - App	2.01	5.52	5.37	5.04
Crisil Liquid Fund Index	3.69	6.65	6.24	5.81

** No units were outstanding under TTMF SHIP Growth plan on 3rd March, 2009 and new units were allotted on 30th April, 2009 at face value. Hence returns are computed from 30th April, 2009.

TGSF, TIF, TLF: No data for benchmark index is available for the period prior to 30th March, 2002.

Past performance may or may not be sustained in future.

Return for period upto 1 year is absolute and for more than one year is compounded annualised. Returns are for growth option.

FUTURE OUTLOOK:

DEBT OUTLOOK

Going ahead, we expect the RBI to continue with its policy of normalizing the accommodative monetary policy by hiking the Repo and Reverse Repo further during FY 2010-11. As a result of this, we expect that the easy liquidity conditions that prevailed in last year expected to reverse and the short term rates to move upward. However, the long term yield curve is expected to remain steady at higher levels in the initial period, before trending downwards in the later part of the year, as inflation cools off and the majority of the borrowing programme gets completed.

FUNDS UNDER MANAGEMENT - OPERATIONS

Tata Mutual Fund today manages thirty-nine open ended schemes of which sixteen are equity schemes, two are balanced schemes, twenty are debt schemes, one is Equity Linked Saving Scheme (ELSS) and nine are close ended schemes of which one is an equity scheme, three are balanced schemes, three are debt schemes, and two are Equity Linked Saving Scheme (ELSS). AUDITORS' REPORT

TO THE BOARD OF DIRECTORS OF TATA TRUSTEE COMPANY LIMITED

We have audited the attached Balance Sheet of **TATA MUTUAL FUND – TATA FLOATING RATE LONG TERM FUND** ("the Fund") as at 31st March, 2010 and the Revenue Account of the Fund for the year ended on that date, annexed thereto, and report thereon as follows:

- a) The Balance Sheet and the Revenue Account dealt with by this report have been prepared in accordance with the accounting policies and standards specified in the Ninth Schedule of the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996. These financial statements are the responsibility of the Managements of the Trustee and the Asset Management companies.
- b) Our audit was conducted in accordance with the generally accepted auditing standards in India. These Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and the disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by the Management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
- c) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- d) The Balance Sheet and the Revenue Account dealt with by this report are in agreement with the books of account of the Fund.
- e) The Fund does not hold any non-traded securities.
- f) Without qualifying our opinion, we draw attention to Note No. 15 of Schedule VII Part B wherein the Managements of the Tata Asset Management Limited and Tata Trustee Company Limited have explained their rationale regarding certain Accounting Standards issued by the Institute of Chartered Accountants of India as not being applicable to mutual funds.
- g) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give the information required by the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 and give a true and fair view in conformity with the accounting principles generally accepted in India:
 - (i) in the case of the Balance Sheet, of the state of affairs of the Fund as at 31st March, 2010 and
 - (ii) in the case of the Revenue Account, of the surplus of the Fund for the year ended on that date.

TATA MUTUAL FUND

Schedule VII - Statement of significant accounting policies and Notes forming part of the Accounts of Tata Floating Rate Long Term Fund (TFRLTF) for the year ended 31st March, 2010.

A. SIGNIFICANT ACCOUNTING POLICIES

1. INCOME RECOGNITION:

- a) Profit or loss on sale of investments is recognised on trade dates. The cost of investments sold is determined on “weighted average cost basis”.
- b) Interest on investments is accounted on an accrual basis. Interest on an investment that is past due for three months is accrued and a full provision is made against all outstanding interest on that investment.
- c) Discounts / premiums to redemption value on fixed income securities are amortised on a straight-line basis over the period upto redemption.
- d) Other income of a miscellaneous nature is accounted when it is received on grounds of prudence.

2. EXPENSES:

- a) All expenses are accounted on an accrual basis.
- b) Expenses not identifiable with any particular scheme are generally allocated to the schemes in proportion to their net assets. Investor related expenses viz: Registrar expenses, investor communications, investor meets etc. are allocated to the schemes in proportion to the number of live folios in the schemes.

3. INVESTMENTS:

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after considering brokerage, commission, stamp charges and any charge customarily included in the broker note.

4. PORTFOLIO VALUATION FOR NAV CALCULATION

i. **Traded Securities (Other than Floating Rate Debt Securities) :**

Traded Securities are valued at year-end closing market rates on the National Stock Exchange of India Ltd. on which the security is traded (excluding accrued interest, if any, which is accounted separately).

In the absence of a quoted price on the valuation date for debt securities (other than Government Securities), the last available quoted price within a period of fifteen days prior to the valuation date may be used for valuation purposes as per Securities Exchange Board of India (SEBI).

ii. **Thinly Traded Securities (Other than Floating Rate Debt Securities) :**

Debt Securities (other than Government Securities) are considered as thinly traded if on the valuation date, there are no individual trades in those securities in marketable lots (presently Rs.5 Crores) on the principal stock exchange or any other stock exchange. These have been valued on the basis of valuation principles laid down by The Securities and Exchange Board of India (SEBI) for the same.

iii. **Non-Traded Securities (Other than Floating Rate Debt Securities) :**

a. Non-Traded/Thinly Traded Debt Securities/Asset Backed Securities of over 182 days to maturity are valued in good faith on a yield to maturity basis by Tata Asset Management Limited (TAML).

The non-traded debt securities have been classified by TAML as "investment grade" and "below investment grade" as at 31st March, 2010. The values applied by TAML for "investment grade" debt securities are on the basis of valuation yields determined by Credit Rating Information Services of India Limited (CRISIL). In the opinion of TAML, these yields determine fair and reasonable values and such basis of valuation is approved by the Tata Trustee Company Limited.

These securities have been valued on the basis of valuation principles laid down by SEBI for the same.

Non-traded debt securities with residual maturity of upto 182 days are valued on the basis of amortisation (cost plus accrued interest till the beginning of the day plus the difference between the redemption value (inclusive of interest) and the cost spread uniformly over the remaining maturity period of the instrument).

This basis of valuation is in accordance with SEBI guidelines.

b. **Valuation of non traded/thinly traded debt securities with floating rate of interest upto 182 Days to the Interest Reset Date/Maturity Date :**

The non-traded / thinly traded floating rate debt securities with a residual maturity / next reset date upto 182 days are valued on the basis of amortisation (cost plus accrued interest till the beginning of the day plus the difference between the redemption value and the cost spread uniformly over the remaining maturity / interest reset period of the instruments) in the absence of any other standard benchmarks in the market.

c. **Floating Rate Debt Securities with Put/Call options :**

The floating rate debt securities with put/call options shall be valued in terms of the Valuation Guidelines specified above taking into consideration the next interest rate reset date instead of the final maturity date in the absence of any other guidelines from SEBI.

The aggregate fair value of these non-traded “investment grade” debt securities as at 31st March, 2010 is Rs. Nil (previous year Rs. Nil). The scheme does not invest in “below investment grade” debt securities. These balances exclude redemption proceeds due but not received Rs. Nil (previous year Rs. Nil).

iv. **Money Market Securities :**

Money Market instruments which are not traded are valued on the basis of amortisation (cost plus accrued interest till the beginning of the day plus the difference uniformly amortised over the remaining maturity period of the instrument).

For Money Market Instruments which are traded, the difference between the traded price and the cost plus accrued interest is booked as unrealised gain or loss on that day and from the next day the unrealised gain or loss is amortised over the remaining period to maturity in such a manner that on the maturity date, the value of security matches the face value.

v. **Investment in Reverse Repo :**

Investment bought on ‘Repo’ basis are valued at cost plus accrued interest.

vi. **Investment in CBLO:**

CBLO investments are valued at cost plus amortisation.

vii. **Government Securities :**

Government securities are valued at the prices released by CRISIL, which is currently the only approved agency suggested by Association of Mutual Funds in India (AMFI) and approved by Securities Exchange Board of India Ltd (SEBI).

viii. **Unrealised Gain / Loss in value of Investments :**

Following the issue of the Guidance Note on Accounting for Investments in the Financial Statements of Mutual Funds by the Institute of Chartered Accountants of India, the appreciation / diminution in investments is worked out on individual basis. The value of diminution as at the year end is reflected in the Revenue Account. Unrealised appreciation as at the year end is also routed through the Revenue Account but is reduced from the distributable income at the time of income distribution.

5. INCOME EQUALISATION RESERVE :

Income Equalisation Reserve is being maintained by crediting / (debiting) the equalisation account in respect of sale / (repurchase) of units by an appropriate amount which represents the distributable income at the time of sale / (repurchase). It is reflected in the Revenue Account after the net excess / deficit of the scheme is determined.

6. UNIT PREMIUM RESERVE AND ACCUMULATED LOAD :

On repurchase / redemption / resale of units, the difference between the unit face value and the NAV (after adjusting income equalisation reserve) is disclosed as “Unit Premium Reserve”, while the difference between the NAV and the repurchase / resale price is disclosed as “Accumulated Load” which is considered for computation of the Net Asset Value. The accumulated load of Rs.24,457/- (previous year Rs.2,018,696/-) is utilised by the Fund to cover the cost of raising / redeeming units on a continuous basis by way of providing redemption / distribution related services to the Fund relating to the sale, promotion and marketing of the scheme and costs associated with liquidating the Fund’s investment securities, including payments for postage, application processing, disseminating NAV related information etc. and also payments to brokers for their services in connection with the distribution / redemption of the units.
