REPORT OF THE TRUSTEE TO THE UNITHOLDERS FOR THE YEAR ENDED 31ST MARCH, 2010

Dear Unitholder,

It gives us great pleasure to enclose schemewise audited financials as on 31st March, 2010. This Report is in continuation of the 'Performance and Portfolio of the Schemes' Report as on 31st March, 2010 published by us earlier.

1. Scheme Performance, Future Outlook and Operations of the Schemes

The year that was:

Debt:

The global economy after suffering one of the worst recessions in FY 2008-2009, started to recover in FY 2009-2010, on the back of massive stimulus by governments across the major economies. However, compared to developed economies, the emerging economies fared well. The GDP growth in India, which had slumped to 6.7% during 2008-2009, grew by 7.4% in FY 2009-10.

The financial market during 2009-10 was characterised by prevalence of comfortable liquidity conditions in money markets despite large government borrowing programme and rising pressure on medium to long-term government bond yield on the back of rising inflationary pressure.

During the year the headline Wholesale Price Index (WPI) inflation, firmed up significantly. While the initial inflationary pressure was largely due to rising food and fuel prices, reflecting the impact of a deficient monsoon on agricultural output and the increase in international crude prices, in the second half of the year, the inflation became increasingly generalized due to persistent supply side pressures. This was evident from the acceleration of inflation in non-food manufactured products from -0.4% in November 2009 to 4.7% in March 2010. These inflationary conditions, coupled with the stronger growth, forced RBI to reverse the accommodative monetary policy. RBI started the reversal of its accommodative policy by hiking CRR by 75 basis points and Repo and Reverse Repo by 25 basis points in Q4 of FY 2009-10.

During the year due to ample liquidity, the call rate hovered around the lower range of the Liquidity Adjustment Facility (LAF) corridor throughout the year. However, longer end of the yield curve continued to shift upwards indicating market concerns of fiscal deficit and rising inflationary pressures. While the medium to long-term bond yields, in general, moved up during the year, reflecting inflation and fiscal deficit concerns, the short-term yield softened till Q3 of 2009-10, reflecting the surplus liquidity conditions, followed by a hardening trend in Q4 as the surplus liquidity reduced and there was a general shift in the interest rate environment. The benchmark 10 year yield which was at 7.01% at the beginning of the year touched at high of 8% in Q4 of 2009-10, before closing at 7.84% towards the end of the year. The corporate bonds were stable, with 5 year AAA yield averaged around 8.25% and closed the year at 8.55%. However, the spread between the 5 Year AAA bond, which had hit a high of around 400 bps at the height of credit crisis in FY2008-09, narrowed down considerably to close the year at 101 bps,.

Tata Fixed Income Portfolio Fund

Underperformed due to small size of corpus resulting in inflexibility to make investments in odd lots and higher impact cost.

Performance at a glance (% as on 31st March, 2010)

	Last 1 year	Last 3 years	Last 5 years	Since Inception
Tata Fixed Income Portfolio Fund				
Scheme A1	RIP 0.43	NA	NA	RIP 5.09 (03/01/08)
Crisil Liquid Fund Index				
Scheme A1	RIP 3.69	NA	NA	RIP 6.30

Past performance may or may not be sustained in future.

Return for period upto 1 year is absolute and for more than one year is compounded annualised. Returns are for growth option.

FUTURE OUTLOOK:

DEBT OUTLOOK

Going ahead, we expect the RBI to continue with its policy of normalizing the accommodative monetary policy by hiking the Repo and Reverse Repo further during FY 2010-11. As a result of this, we expect that the easy liquidity conditions that prevailed in last year expected to reverse and the short term rates to move upward. However, the long term yield curve is expected to remain steady at higher levels in the initial period, before trending downwards in the later part of the year, as inflation cools off and the majority of the borrowing programme gets completed.

FUNDS UNDER MANAGEMENT - OPERATIONS

Tata Mutual Fund today manages thirty-nine open ended schemes of which sixteen are equity schemes, two are balanced schemes, twenty are debt schemes, one is Equity Linked Saving Scheme (ELSS) and nine are close ended schemes of which one is an equity scheme, three are balanced schemes, three are debt schemes, and two are Equity Linked Saving Scheme (ELSS). The average net assets under management were around Rs 21935.17 crores as on 31/03/10 which have increased from Rs. 17029.87 crores as on 31/03/09 showing an increase of Rs 4905.30 crores. TATA MUTUAL FUND

Schedule VII - Statement of significant accounting policies and Notes forming part of the Accounts of Tata Fixed Income Portfolio Fund Scheme A1 (TFIPA1) for the year ended 31st March, 2010.

A. SIGNIFICANT ACCOUNTING POLICIES

1. INCOME RECOGNITION:

- a) Profit or loss on sale of investments is recognised on trade dates. The cost of investments sold is determined on “weighted average cost basis”.
- b) Interest on investments is accounted on an accrual basis. Interest on an investment that is past due for three months is accrued and a full provision is made against all outstanding interest on that investment.
- c) Discounts / premiums to redemption value on fixed income securities are amortised on a straight-line basis over the period upto redemption.
- d) Other income of a miscellaneous nature is accounted when it is received on grounds of prudence.

2. EXPENSES:

- a) All expenses are accounted on an accrual basis.
- b) Expenses not identifiable with any particular scheme are generally allocated to the schemes in proportion to their net assets. Investor related expenses viz: Registrar expenses, investor communications, investor meets etc. are allocated to the schemes in proportion to the number of live folios in the schemes.

3. INVESTMENTS:

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after considering brokerage, commission, stamp charges and any charge customarily included in the broker note.

4. PORTFOLIO VALUATION FOR NAV CALCULATION

i. **Traded Securities (Other than Floating Rate Debt Securities):**

Traded Securities are valued at year-end closing market rates on the principal stock exchange (National Stock Exchange of India Ltd) on which the security is traded (excluding accrued interest, if any, which is accounted separately).

In the absence of a quoted price on the valuation date for debt securities (other than Government Securities), the last available quoted price within a period of fifteen days prior to the valuation date is used for valuation purposes as per the Securities and Exchange Board of India (SEBI) (Mutual Fund) Regulations, 1996.

ii. **Thinly Traded Securities (Other than Floating Rate Debt Securities):**

Debt Securities (other than Government Securities) are considered as thinly traded if on the valuation date , there are no individual trades in those securities in marketable lots (presently Rs.5 Crores) on the principal stock exchange or any other stock exchange. These have been valued on the basis of valuation principles laid down by The Securities and Exchange Board of India (SEBI) for the same.

iii. **Investment in Reverse Repo :**

Investment bought on 'Repo' basis are valued at cost plus accrued interest.

iv. **Unrealised Gain / Loss in value of Investments :**

Following the issue of the Guidance Note on Accounting for Investments in the Financial Statements of Mutual Funds by the Institute of Chartered Accountants of India, the appreciation / diminution in investments is worked out on individual basis. The value of diminution as at the year end is reflected in the Revenue Account. The loss on investments sold or transferred during the period or year is charged to the revenue account instead of being first adjusted against the provision for depreciation, if already created in the previous year. However, this departure from the Guidance Note does not have any impact on the scheme's net assets and the financial statements of the scheme.

Unrealised appreciation as at the year end is also routed through the Revenue Account but is reduced from the distributable income at the time of income distribution.

5. INCOME EQUALISATION RESERVE :

Income Equalisation Reserve is being maintained by crediting / (debiting) the equalisation account in respect of sale / (repurchase) of units by an appropriate amount which represents the distributable income at the time of sale / (repurchase). It is reflected in the Revenue Account after the net excess / deficit of the scheme is determined.

6. UNIT PREMIUM RESERVE AND ACCUMULATED LOAD :

On repurchase / redemption / resale of units, the difference between the unit face value and the NAV (after adjusting income equalisation reserve) is disclosed as “Unit Premium Reserve”, while the difference between the NAV and the repurchase / resale price is disclosed as “Accumulated Load” which is considered for computation of the Net Asset Value. The accumulated load of Rs.970/- (previous year Rs.20,620/-) is utilised by the Fund to cover the cost of raising / redeeming units on a continuous basis by way of providing redemption / distribution related services to the Fund relating to the sale, promotion and marketing of the scheme and costs associated with liquidating the Fund’s investment securities, including payments for postage, application processing, disseminating NAV related information etc. and also payments to brokers for their services in connection with the distribution / redemption of the units. The utilisation of the load reserve is disclosed in “Accumulated Load” account in Schedule.

B. Notes attached to and forming part of the accounts for the year ended 31st March, 2010.
