I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- Tata Mid Cap Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their tax and Investment Advisor before they invest in the Scheme.
- The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:

India Index Services & Products Limited (IISL) Disclaimer - "Tata Mid Cap Fund, which is benchmarked to CNX Midcap Index is not sponsored, endorsed, sold or promoted by India Index Services & Products Limited (IISL). IISL is not responsible for any errors or omission or the results obtained from the use of such index and in no event shall IISL have any liability to any party for any damages of whatsoever nature (including lost profits) resulted to such party due to purchase or sale or otherwise of such Product benchmarked to such index".

Trading Volumes and Settlement Periods may restrict liquidity in equity and debt investments. In case of mid cap companies such liquidity risks is likely to be high. Further prices of stock in mid – cap companies are also likely to be more volatile.

Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by TAML. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the Asset Management Company, the Custodian, the Registrar, any Associate, any Distributor, Dealer, any Company, Corporate Bodies, Trusts, any Retirement and Employee Benefit Funds or any Associate or otherwise, any scheme / mutual fund managed by the Asset Management Company or by any other Asset Management Company may invest in the Scheme. While at all times the Trustee Company and the Asset Management Company will endeavour that excessive holding of Units in the Scheme among a few Unitholders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unitholder in the Scheme. Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemptions and this may impact the ability of other Unitholders to redeem their respective Units.

Investment Risks

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

The scheme may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuations. However these techniques and instruments if imperfectly used have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Risk Associated with Securitised Debt

Scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). Asset Backed Securities (ABS) are securitized debts where the underlying assets are receivables arising from automobile loans, personal loans, loans against consumer durables, etc. Mortgage backed securities (MBS) are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties. ABS/MBS instruments reflect the undivided interest in the underlying pool of assets and do not represent the obligation of the issuer of ABS/MBS or the originator of the underlying receivables. The ABS/MBS holders have a limited recourse to the extent of credit enhancement provided. If the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided, ABS/MBS holders will suffer credit losses. ABS/MBS are also normally exposed to a higher level of reinvestment risk as compared to the normal corporate or sovereign debt. At present in Indian market, following types of loans are amortised:

- Auto Loans (cars / commercial vehicles /two wheelers)
- Residential Mortgages or Housing Loans
- Consumer Durable Loans
- Personal Loans

The main risks pertaining to each of the asset classes above are described below:

Auto Loans (cars / commercial vehicles /two wheelers)

- The underlying assets (cars etc) are susceptible to depreciation in value whereas the loans are given at high loan to value ratios. Thus, after a few months, the value of asset becomes lower than the loan outstanding. The borrowers, therefore, may sometimes tend to default on loans and allow the vehicle to be repossessed.
- These loans are also subject to model risk. ie if a particular automobile model does not become popular, loans given for financing that model have a much higher likelihood of turning bad. In such cases, loss on sale of repossession vehicles is higher than usual.
- Commercial vehicle loans are susceptible to the cyclical nature in the economy. In a downturn in economy, freight rates drop leading to higher defaults in commercial vehicle loans. Further, the second hand prices of these vehicles also decline in such economic environment.

Housing Loans

- Housing loans in India have shown very low default rates historically. However, in recent years, loans have been given at high loan to value ratios and to a much younger borrower classes. The loans have not yet gone through the full economic cycle and have not yet seen a period of declining property prices. Thus the performance of these housing loans is yet to be tested and it need not conform to the historical experience of low default rates.

Consumer Durable Loans

- The underlying security for such loans is easily transferable without the bank's knowledge and hence repossession is difficult.
- The underlying security for such loans is also susceptible to quick depreciation in value. This gives the borrowers a high incentive to default.

Personal Loans

- These are unsecured loans. In case of a default, the bank has no security to fall back on.
- The lender has no control over how the borrower has used the borrowed money.

Further, all the above categories of loans have the following common risks:

- All the above loans are retail, relatively small value loans. There is a possibility that the borrower takes different loans using the same income proof and thus the income is not sufficient to meet the debt service obligations of all these loans.
- In India, there is no ready database available regarding past credit record of borrowers. Thus, loans may be given to borrowers with poor credit record.
- In retail loans, the risks due to frauds are high.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme / Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the scheme. These two conditions shall be complied with in each calendar quarter, on an average basis, as specified by SEBI. In case the scheme does not have a minimum of 20 investors in the stipulated period, the provision of Regulation 39 (2) (c) of the SEBI (Mutual Funds) Regulations would become applicable automatically without any reference from SEBI and accordingly the scheme shall be wound up and the units would be redeemed at the applicable NAV. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

Investors are urged to study the terms of the SID carefully before investing in this Scheme, and to retain this SID for future reference.

Tax Consequences

Redemption by the unitholders due to change in the fundamental attribute (if any, in future) of the scheme or due to any other reason may entail tax consequences for which the Trustees, AMC, Fund their Directors / employees shall not be liable.

Disclosure / Disclaimer

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open ended equity scheme.

B. INVESTMENT OBJECTIVE OF THE SCHEME

The investment objective of the Scheme is to provide income distribution and / or medium to long term capital gains by investing predominantly in equity / equity related instruments of mid cap companies.

Mid Cap companies for the purpose of this scheme information document are generally those companies that are either included in the CNX Midcap index or one that fall within market cap requirement of CNX Midcap index.

C. ASSET ALLOCATION AND RISK PROFILE

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) generally be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum Upto	Maximum Upto	High/Medium/Low
Equity and Equity related instruments:			
– Mid Cap Stocks	65	100	High
– Other Stocks	0	35	High
Debt, Money Market and securitized debt instruments*	0	35	Low to medium

* Investment by the scheme in securitized debt will not normally exceed 20% of the net assets of the scheme.

No investments will be made in foreign securitized debt.

Investments in derivative instruments may be done for hedging and Portfolio balancing. The scheme will have a maximum derivative net position of 50% of the net assets of the scheme.

Not more than 25% of the net assets of the scheme shall be deployed in securities lending. The Scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending.

The Trustee Company may from time to time for a short term period under exceptional circumstances on defensive consideration modify / alter the investment pattern / asset allocation the intent being to protect the Net Asset Value of the Scheme & Unitholders interest without seeking consent of the unitholders.

Change in Investment Pattern

The Investment Pattern as outlined above is indicative. Investment strategy and pattern may be deviated from time to time, provided such modification is in accordance with the Scheme objective and Regulations as amended from time to time including by way of Circulars, Press Releases, or Notifications issued by SEBI or the Government of India to regulate the activities and growth of Mutual Funds, the intent being to protect the Net Asset Value of the Scheme and Unitholders' interests. The asset allocation pattern may be modified in the interest of investors; and to protect the NAV of the Schemes, however, the same will be reviewed by the trustee on a quarterly basis and will be rebalanced to its normal position within a period of three months or in a time frame as permitted by the trustee.

D. WHERE WILL THE SCHEME INVEST

Investment in Equities and Debt Instruments

The scheme will predominantly invest in equity and equity related instruments of mid cap companies. Apart from this the scheme may also invest in other equities as well as debt and money market instruments. Debt and Money Market instruments will include the following:

- Money Market Instruments like Commercial Paper, Certificate of Deposit, short term Deposit, Treasury Bills and short term debt instruments etc. issued by various Corporates, Government - State or Central, Public Sector Undertakings,
- Non convertible portion of Convertible Debentures (Khokas), Non Convertible Debentures,
- Securitised Debt (asset backed securities excluding mortgage backed securities), Secured Premium Notes,
- Zero Interest Bonds, Deep Discount Bonds, Floating Rate Bonds/Notes,
- Government Securities.

The above list is illustrative and not the exhaustive and may include other securities as may be available / introduced in the market.

Securities Lending: The scheme may deploy funds of the scheme in securities lending. Not more than 25% of the net assets of the scheme shall be deployed in securities lending. The Scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending.

Investment in Securities of Group Companies:

As per SEBI (Mutual Funds) Regulations 1996, the Fund shall not make any investments in any un-listed securities of associate/ group companies of the Sponsors. The Fund will also not make investment in privately placed securities issued by associate / group companies of the Sponsors. The Fund may invest not more than 25% of the net assets in listed securities of Group companies.

Investment in Securitised Debt

Securitised debt would be maximum upto 20% of the net assets of the scheme. Inherently, securitized debt is a riskier instrument as compared to similar debt instruments, as shown by the risk factors for securitized debt. The fund manager would therefore use great caution / discretion whilst dealing in such paper he would use it only in situation where the securitized debt is giving a marginally better return for a similarly profiled debt instrument or conversely, if a securitized debt instrument and a debt instrument are giving the same yield but the debt instrument is rated one notch lower in rating profile. It would be endeavored to ensure that the over all risk profile of the portfolio does not get materially concentrated in securitized debt, and usage is only to get a better yield if the risk profile of the portfolio is not affected too adversely.

The AMC may from time to time for a short term period on defensive consideration invest upto 100% of the funds available in Money Market Instruments, the primary motive being to protect the Net Asset Value of the Scheme and protect unitholders interests so also to earn reasonable returns on liquid funds maintained for redemption/repurchase of units. The Trustee Company may from time to time for a short term period under exceptional circumstances on defensive consideration modify/ alter the investment pattern / asset allocation the intent being to protect the Net Asset Value of the Scheme & Unitholders interests without seeking consent of the unitholders.

Trading in Derivatives - Exposure to derivative instruments will not exceed 50% of the portfolio value (i.e. net assets including cash). Investments in derivative instruments may be done for hedging and Portfolio balancing.

The Fund may invest in derivatives instruments such as Futures, Options, Forward Rate Agreements (FRAs) & Interest Rate Swaps (IRS) or such other instruments as may be permitted under the regulations. **The use of derivatives will only be done for hedging and portfolio balancing in accordance with the SEBI (Mutual Funds) Regulations and within the parameters approved by the Trustee Company.** Example :In case of IRS the fund manager who has a view that that the interest rates are expected to rise he would swap the fixed rate debt with floating rate debt instruments. The reverse would be done that sell floating and buy fixed if the expectations are there of interest rate coming down. In case of equity the fund would trade in options and futures only for hedging and portfolio balancing. If the view is that the markets are expected to rise then having cash in the scheme the fund manager would go long on the nifty futures or on individual script futures if on the other hand the fund is of the view that the equity markets are to fall having shares in the portfolio would not be good for the investors then the fund manager would sell the nifty futures or any individual stock futures. Thus, as can be seen from the above example Derivatives is an activity to be conducted with discretion, particularly to protect the investors interest, in a choppy market scenario. When the fund manager is holding plain stock but is apprehensive of a market fall in prices of such stocks, he would use derivatives as above to ensure against a dramatic deterioration in NAV. Investors therefore would get the benefit of a protective shield in the event of sharp market volatility where it would be operationally unviable to buy / sell very large volumes in the cash market.

The Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc. The Scheme may write (sell) and purchase call and put options in securities in which it invests and on securities indices based on securities in which the scheme invests. Through the purchase and sale of futures contracts and related options on those contracts the Fund would seek to hedge against a decline in securities owned by the Fund or an increase in the prices of securities which the Fund plans to purchase. The Fund would sell futures contracts on securities indices in anticipation of a fall in stock prices, to offset a decline in the value of its equity portfolio. When this type of hedging is successful, the futures contract increase in value while the Fund's investment portfolio declines in value and thereby keep the Fund's net asset value from declining as much as it otherwise would. Similarly, when the Fund is not fully invested, and an increase in the price of equities is expected, the Fund would purchase futures contracts to gain rapid market exposure that may partially or entirely offset increase in the cost of the equity securities it intends to purchase.

Exposure to Derivatives

The Scheme will have a maximum derivative net position of 50% of the portfolio (i.e net assets) of the scheme. The limits on equity derivatives exposure per scrip / instruments and derivative positions are given below:

TATA MID CAP FUND

Sr. No.	Derivative	Action	Description	Limit
1	Index futures	Buy	Buy futures against cash to protect against rising market.	To the extent of cash / equivalents in the portfolio. Max limit (50%) of portfolio.
2	Index futures	Sell	Hedging of portfolio against expected market downturn.	Up to (100%) of equity portion of the scheme or (50%) of the net assets of the scheme whichever is lower.
3	Index futures - Call	Buy	Buy index calls against cash (existing / expected to protect against rising market.	To the extent of cash/equivalents in the portfolio. Max. limit (50%) of portfolio.
4	Index Options - Call	Sell	Covered Call Sale-against existing portfolio.	Up to (100%) of equity portion of the scheme or (50%) of the net assets of the scheme whichever is lower.
5	Index Options - Put	Buy	Buy index puts to hedge existing portfolio.	Up to (100%) of equity portion of the scheme or (50%) of the net assets of the scheme whichever is lower.
6	Index Options - Put	Sell	Covered Put Sale-Possible top sell index puts against existing / expected cash.	To the extent of cash/equivalents in the portfolio. Max. limit (50%) of portfolio.
7	Stock futures	Buy	Buy against cash to protect against rising share prices.	To the extent of cash/equivalents in the portfolio. Max. limit (50%) of portfolio; per scrip limit (10%) of the net assets of the scheme.
8	Stock futures	Sell	Sell against existing stock – Hedging against downside on existing stock in the face of expected volatility in the stock price.	To the extent of the particular scrip holding in the portfolio; Max. limit (50%) of portfolio; per scrip limit (100%) of the holding.
9	Stock options - Call	Buy	Buy against cash to protect against rising share prices.	To the extent of cash/equivalents in the portfolio. Max. limit (50%) of portfolio; per scrip limit (10%) of the net assets of the scheme.
10	Stock options - Call	Sell	Sell against existing stock.	To the extent of the particular scrip holding in the portfolio; Max. limit 50% of portfolio; per scrip limit (100%) of the holding.
11	Stock option - Put	Buy	Purchase against existing stock. Hedging against downside on existing stock in the face of expected volatility in the stock price.	To the extent of the particular scrip holding in the portfolio; Max. limit (50%) of portfolio; per scrip limit (100%) of the holding.
12	Stock option - Put	Sell	Covered Put Sale against cash.	To the extent of cash/equivalents in the portfolio. Max. limit (50%) of portfolio; per scrip limit (10%) of the net assets of the scheme.

Note: The per scrip limit disclosed above is as a % of the holding in the scrip and not as a % of the portfolio of the Scheme.

Example 1. Hedging against an anticipated rise in equity prices

The scheme has a corpus of Rs.100 crores and has invested Rs.85 crores in equity and still has a cash of Rs.15 crores available to invest. The Fund may buy index futures of a value of Rs.15 crores. The scheme may reduce the exposure to the future contract by taking an offsetting position as investments are made in the equities the scheme wants to invest in. Here, if the market rises, the scheme gains by having invested in the index futures.

Event	Gain/(Loss) from derivative position	Gain/(Loss) from cash market position	Overall Gain / (Loss) to Scheme
5% rise in equity price	15 * 5% = Rs. 0.75 crs	85 * 5% = Rs. 4.25 Crs	Rs. 5 crores
5% fall in equity price	15 * 5% = (Rs. 0.75 crs)	85 * 5% = (Rs. 4.25 Crs)	(Rs. 5 crores)

Example 2:- Hedging against anticipated fall in equity prices:-

If the Fund has a negative view on the market and would not like to sell stocks as the market might be weak, the scheme of the Fund can go short on index futures. Later, the scheme can sell the stocks and unwind the future positions. A short position in the future would offset the long position in the underlying stocks and this can curtail potential loss in the portfolio.

For eg. the scheme has a corpus of Rs.100 crores and is fully invested in equities. If fund manager wishes to reduce the equity exposure to Rs. 80 crores in a short time, he would sell index future contracts of Rs. 20 crores.

Event	Gain / (Loss) from derivative position	Gain / (Loss) from cash market position	Overall Gain / (Loss) to Scheme
5% fall in equity price	20 * 5% = Rs. 1 crs	80 * 5% = (Rs. 4.00 Crs)	(Rs. 3 crores)
5% rise in equity price	20 * 5% = (Rs. 1 crs)	80 * 5% = Rs. 4 Crs	Rs. 3 crores

Interest Rate Swaps

An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount. This is illustrated below:

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount : Rs. 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate : 9.90%
5. At the end of 91 days;
6. The Scheme pays : fixed rates for 91 days is 9.90%
7. TMF receives : compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives $\text{Rs. } 2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

The Plans of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which have occurred. In such cases the plans can enter into a received position (IRS) where the plans will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below:

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount : Rs. 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate : 10.25%
5. At the end of 91 days;
6. The Scheme pays : compounded call rates for 91 days is 9.90%
7. TMF receives : Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives $\text{Rs. } 2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period.

The interest rate benchmarks that are commonly used for floating rate in interest rate swaps are those on various Money Market Instruments. In Indian markets, the benchmark most commonly used is MIBOR.

The Plans of the fund are reasonably invested, and the view of the fund manager is interest rates are expected to move up due to certain negative events which are expected to occur at a specified future date. In such cases the plans can enter into a paid position (FRA) at a specified date in the future where the plans will pay a fixed rate for a specified maturity and receive the floating rate of interest at a specified future date. This is illustrated below.

Example 1: Use of FRA

The fund Manager believes in 3 months time the interest rates will be higher and decides to enter into an FRA agreement 3x9 to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio which is for the notional amount of Rs 2 crore where the bank agrees to pay 6% fixed, in case the 6 month OIS rate is greater than 6% the bank will pay the difference to the portfolio manager 3 months hence for 6 months. Say 3 months hence the OIS rate for six months is 6.50%.

This like IRS is cash settled and the bank at the end of three months will pay the portfolio manager the following $(6.50-6.00) \times 181 \times 200,000,00 / (365 \times 100 + 6.50 \times 181) = \text{Rs } 48040.55$ for six months.

The Plans of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which are expected to occur at a specified future date. In such cases the plans can enter into a received position (FRA) at a specified date in the future where the plans will receive a fixed rate for a specified maturity and pay the floating rate of interest at a specified future date. This is illustrated below.

Example 2: Use of FRA

The fund Manager believes in 3 months time the interest rates will be lower and decides to enter into an FRA agreement 3x9 to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio which is for the notional amount of Rs 2 crore where the bank agrees to pay 6% fixed,

in case the 6 month OIS rate is less than 6% the bank will pay the difference to the portfolio manager 3 months hence for 6 months. Say 3 months hence the OIS rate for six months is 5.50%.

This like IRS is cash settled and the bank at the end of three months will pay the portfolio manager the following $(6.00-5.50) \times 181 \times 200,000.00 / (365 \times 100 + 5.50 \times 181) = \text{Rs } 48272.76$ for six months.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialised instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments”.

The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents viz. MOA/ AOA of the TAML/Trustee Company, IMA and the Trust Deed.

E. THE INVESTMENT STRATEGIES

Mid Cap companies for the purpose of this scheme information document are generally those companies that are either included in the CNX Midcap index or one that fall within market cap requirement of CNX Midcap index.

The fund manager will consider the market capitalisation of the company at the time of investment & if it is within the above mentioned limits the investment decision would be made, other things being satisfactory.

Mid Cap companies tend to be under researched and thereby give an opportunity to invest in a company that is yet to be identified by the market. Such companies offer higher growth potential going forward and therefore an opportunity to benefit from higher than average valuations. The Scheme will normally invest in stocks of mid cap companies having sound track record, quality management, earnings and growth potential, strong fundamentals, good market share / export market, quality products, etc.

The scheme may also invest in debt instruments such as non convertible portion of Convertible Debentures (Khokas), Non Convertible Debentures, Securitised Debt, Secured Premium Notes, Zero Interest Bonds, Deep Discount Bonds, Floating Rate Bonds / Notes, Government securities and Money Market Instrument like Call Deposit, Repos, Commercial Paper, Certificate of Deposit, Treasury Bills, etc. for providing ongoing liquidity & preservation of capital in a bear market.

Portfolio Turnover

“Portfolio Turnover” is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme’s portfolio during the given period of time. It is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived there of. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips/securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

F. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

(i) Type of a scheme

An open ended equity scheme.

(ii) Investment Objective

The investment objective of the Scheme is to provide income distribution and / or medium to long term capital gains by investing predominantly in equity / equity related instruments of mid cap companies.

Investment Pattern and Risk Profile:

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) generally be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum Upto	Maximum Upto	High/Medium/Low
Equity and Equity related instruments:			
– Mid Cap Stocks	65	100	High
– Other Stocks	0	35	High
Debt, Money Market and securitized debt instruments*	0	35	Low to medium

* Investment by the scheme in securitized debt will not normally exceed 20% of the net assets of the scheme.

No investments will be made in foreign securitized debt.

TATA MID CAP FUND

Investments in derivative instruments may be done for hedging and Portfolio balancing. The scheme will have a maximum derivative net position of 50% of the net assets of the scheme.

The Trustee Company may from time to time, for a short term period on defensive consideration, modify / alter the investment pattern / asset allocation, the intent being to protect the Net Asset Value of the Scheme and Unitholders interests, without seeking consent of the unitholders.

(iii) Terms of Issue

Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 1996, the repurchase price shall not be lower than 93% of the NAV, the sale price will not be higher than 107% of the NAV and further that the difference between the sale and repurchase price shall not exceed 7% calculated on the sale price.

Listing is not envisaged as the Scheme is an open-ended Scheme, with the Fund providing for sales and repurchase on a continuous basis.

Maximum recurring expenses on the first Rs 100 Crores 2.50% of average weekly net assets (also refer to para on annual recurring expenses in this SID).

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- (i) A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- (ii) The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

G. SCHEME BENCHMARK

CNX Midcap Index

The composition of the aforesaid benchmarks is such that, they are most suited for comparing performance of the respective plans. The Trustees may change the benchmark in future if a benchmark better suited to the investment objective of the scheme is available.

I. Restrictions on Investments (as per seventh schedule of SEBI {Mutual Funds} Regulations 1996)

1. No Mutual Fund under all its Schemes should own more than 10% of the Companies paid-up capital carrying voting rights.
2. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if:-
 - (a) such transfers are done at the prevailing market price for quoted instruments on spot basis.
Explanation- "spot basis" shall have same meaning as specified by stock exchange for spot transactions.
 - (b) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
3. A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate interscheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.
Provided that this clause shall not apply to any fund of funds scheme.
4. Every mutual fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:
Provided that a mutual fund may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI:
Provided further that a mutual fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by SEBI."
Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.
5. Every mutual fund shall, get the securities purchased or transferred in the name of the mutual fund on account of the concerned scheme, wherever investments are intended to be of long term nature.
6. Pending deployment of funds of a scheme in terms of investment objectives of the scheme, a mutual fund may invest them in short term deposits of schedule commercial banks, subject to such Guidelines as may be specified by SEBI".
7. No mutual fund scheme shall make any investment in;
 - a) any unlisted security of an associate or group company of the sponsor; or
 - b) any security issued by way of private placement by an associate or group company of the sponsor; or
 - c) the listed securities of group companies of the sponsor which is in excess of 25% of the net assets of the schemes.
- 7A) No scheme of a mutual fund shall make any investment in any fund of fund scheme.
8. No Mutual Fund Schemes shall invest more than 10% of its NAV in the equity shares or equity related instruments of any Company including units/securities of Venture Capital Funds.
Provided that, the limit of 10 per cent shall not be applicable for investments in case of index fund or sector or industry specific scheme.
9. A Mutual Fund shall not invest more than 5% of its NAV in unlisted equity shares or equity related instruments including units/securities of Venture Capital Funds in case of open ended schemes.

These investment limitations / parameters (as expressed / linked to the net asset / net asset value / capital) shall in the ordinary course apply as at the date of the most recent transaction or commitment to invest, and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, TAML shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

In addition, certain investment parameters (like limits on exposure to Sectors, Industries, Companies, etc.) may be adopted internally by TAML, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / TAML may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its investment objective. As such all investments of the Scheme will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

Investment by the Fund and the Asset Management Company

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996, the scheme may invest in another scheme/plan/fund under the management of TAML or any other mutual fund without charging any fees. The aggregate inter-scheme investments made by all schemes/plans/funds under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund. The objective of the Scheme in investing in Schemes of TMF or any other Mutual Fund will be primarily to gain better yields in the short term as compared to other short term instruments in the money market.

TAML (the AMC) may invest in the scheme(s)/plan(s)/fund(s), either in the initial issue or on an ongoing basis, such amount, as they deem appropriate. The AMC shall not be entitled to charge any management fees on this investment in the scheme(s)/plan(s)/fund(S). Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996.

Securities Lending by the Mutual Fund

Subject to the SEBI Regulations as applicable from time to time the Fund may, if the Trustee permits, engage in Stock Lending. Stock Lending means the lending of securities to another person or entity for a fixed period of time at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Stock Lending.

Not more than 25% of the net assets of the scheme can generally be deployed in stock lending and not more than 5% of the scheme can be deployed in Stock lending to any single counterparty. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A fund has an equity share of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the share, from time to time if any, on the exchange. If the fund is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (scheme) at a stipulated time or on demand for a negotiated compensation. The fund's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the fund would participate in stock lending would be:

1. There is a holding of security eg 1 lakh shares of XYZ Ltd in the fund which the fund manager wants to be the core holding of the scheme for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs XYZ Ltd shares to settle it) who is willing to put up a proper collateral for the same. (In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the fund and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above, and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

<p>Ongoing price for subscription (purchase) / switch-in (from other schemes / plans of the mutual fund) by investors. This is the price you need to pay for purchase/switch-in. <i>Example: If the applicable NAV is Rs. 10, entry load is 2% then sales price will be: Rs. 10* (1+0.02) = Rs. 10.20</i></p>	<p>At the applicable NAV subject to prevailing entry loads, if any.</p>
<p>Ongoing price for redemption (sale) / repurchase /switch outs (to other schemes/plans of the Mutual Fund) by investors. This is the price you will receive for redemptions/switch outs. <i>Example: If the applicable NAV is Rs. 10, exit load is 2% then redemption price will be: Rs. 10* (1-0.02) = Rs. 9.80</i></p>	<p>At the applicable NAV subject to prevailing exit load, if any. The Fund shall ensure that the Redemption Price is not lower than 93% of the NAV and the Purchase Price is not higher than 107% of the NAV, provided that the difference between the Redemption Price and Purchase Price of the Units shall not exceed the permissible limit of 7% of the Purchase Price, as provided for under the Regulations.</p>
<p>Cut off timing for subscriptions / redemptions and switches This is the time before which your application (complete in all respects) should reach the official points of acceptance.</p>	<p>In respect of valid purchase applications (alongwith the necessary documents and a local cheque or a demand draft payable at par at the place where the application is being submitted) / redemption application accepted at a designated collection centre upto 3 p.m. on a business day by the Mutual Fund, the closing NAV of such day will be applicable. In respect of valid purchase applications (alongwith the necessary documents and a local cheque or a demand draft payable at par at the place where the application is being submitted) / redemption application accepted at a designated collection centre after 3 pm on a business day, the NAV of next business day will be applicable. Outstation cheques / demand drafts will not be accepted. Valid application for “switch out” shall be treated as redemption and for “switch in” shall be treated as purchases and the relevant NAV of “Switch in” and “Switch Out” shall be applicable accordingly.</p>

TATA MID CAP FUND

Where can the applications for redemption and switches be submitted?	The details of official points of acceptance etc. are provided on the back cover page.
Minimum amount for purchase / redemption and switches	<p>Minimum Amount for Purchase Dividend Option: Rs. 5,000/- and in multiples of Re. 1/- thereafter. Growth Option: Rs. 5,000/- and in multiples of Re. 1/- thereafter.</p> <p>For additional investment Rs. 1,000/- and multiples of Re. 1/- thereafter</p> <p>The repurchase / switches request can be made for a minimum of Rs. 1000/- / 100 units or in multiples of Rs. 1000/- / 100 units thereafter or for all the Units.</p>
Maximum amount for redemption and switch-outs	<p>(a) The repurchase would be permitted to the extent of credit balance in the Unit holder's account.</p> <p>(b) In case of receipt of the repurchase requests (including repurchase requests carried forward in accordance with this clause) in excess of 15% of the outstanding units at the beginning of any repurchase day, the AMC reserves the right to carry forward excess units, on a prorate basis, to the next repurchase day and such excess units shall be processed at the applicable NAV of next repurchase day. However AMC reserves the right to accept Repurchase Request in Rupees also.</p>
Minimum balance to be maintained and consequences of non maintenance.	<p>The Fund may mandatorily redeem all the Units of any Unitholder:</p> <p>(a) if the value of the account falls below the minimum Account balance of Rs.5,000/- (based on prevailing NAV) and / or 500 Units due to normal repurchase / switch and the unitholders fails to invest sufficient funds or to purchase sufficient units to bring the value of the account upto the minimum level within 30 days after a written intimation in this regard is sent by the fund to that unitholder; or</p> <p>(b) where the Units are held by a Unitholder in breach of any regulations.</p>
Special Products available	<p>a) Systematic Investment Plan (SIP)</p> <p>The investors can benefit by investing specified Rupees amounts at regular intervals. The SIP allows the unitholders to invest a fixed amount of Rupees at regular intervals for purchasing additional units of the scheme at NAV based prices. Investment can be done with the minimum / maximum amount and number of cheques specified by AMC from time to time. The cheques will be presented on the dates mentioned on the cheque and subject to realization. Units will be allotted at the applicable NAV along with applicable load.</p> <p>"SIP facility is available subject to terms and conditions. Please refer to the SIP Enrolment form for terms and conditions before enrolment."</p> <p>b) Systematic Withdrawal Plan (SWP)</p> <p>This facility available to the unitholders of the scheme enables them to redeem fixed sums or fixed number of units from their unit accounts at periodic intervals. The amount withdrawn under SWP by redemption shall be converted into the Scheme units at the Repurchase price and such units will be subtracted from the unit balance of that unitholder. In case the date falls during a book closure period the immediate next Business day will be considered for this purpose.</p> <p>The Authorised Investor Service Center may terminate SWP on receipt of a notice from the unitholder. It will terminate automatically if all units are liquidated or withdrawn from the account or upon the receipt of notification of death or incapacity of the unitholder.</p> <p>"SWP facility is available subject to terms and conditions. Please refer to the SWP Enrolment form for terms and conditions before enrolment."</p> <p>c) Systematic Transfer Plan (STP)</p> <p>A unitholder may establish a Systematic Transfer Plan (STP) and choose to transfer on a monthly or a quarterly basis from one TMF Scheme to another TMF Scheme on a date prescribed by the Investment Manager. The amount thus withdrawn by redemption shall be converted into units at the applicable NAV on the scheduled day and such units will be subtracted from the unit balance of that unitholder. Unitholders may change the amount, not below the specified minimum, by giving two weeks prior written notice to the registrars. STP may be terminated automatically if the balance falls below the minimum account balance or upon the receipt of notification of death or incapacity of the unitholders by the fund. Rules relating to the plan may be changed from time to time by the Investment Manager.</p> <p>"STP facility is available subject to terms and conditions. Please refer to the STP Enrolment form for terms and conditions before enrolment."</p>

These would be firms & societies which are held directly or indirectly but ultimately to the extent of atleast 60% by NRIs & trusts in which atleast 60% of the beneficial interest is similarly held irrevocably by such persons (OCBs). • Non-Resident Indians residing in the United States of America and Canada. <p>The Fund reserves the right to include / exclude new / existing categories of investors to invest in the scheme from time to time, subject to SEBI Regulations and other than prevailing statutory regulations, if any.</p> <p>If a person resident of India at the time of subscription becomes a person resident outside India subsequently, shall have the option to either be paid Redemption value of Units, or continue into the Scheme if he/ she so desires and is otherwise eligible. However, the person who desires to continue in the Scheme shall not be entitled to any interest or any compensation during the period it takes for the Fund to record the change in Address and the Residential Status. Notwithstanding the aforesaid, the Trustee Company reserves the right to close the Unitholder account and to pay the Redemption value of Units, subsequent to his becoming a person resident outside India, should the reasons of expediency,</p>

	<p>cost, interest of Unitholders and other circumstances make it necessary for the Fund to do so. In such an event, no resident Unitholders who have subsequently become resident outside India shall have a right to claim the growth in capital and/ or income distribution.</p> <p>This scheme has not been registered in any country outside India. To ensure compliance with any Laws, Acts, Enactments, etc. including by way of Circulars, Press Releases, or Notifications of Government of India, the Fund may require/give verification of identity/any special/additional subscription-related information from /of the Unitholders(which may result in delay in dealing with the applications, Units, benefits, distribution, etc./giving subscription details, etc). Each Unitholder must represent and warrant to the Trustee Company/AMC that, among other things, he is able to acquire Units without violating applicable laws. The Trustee Company will not knowingly offer or sell Units to any person to whom such offer or sale would be unlawful, or might result in the Fund incurring any liability or suffering any other pecuniary disadvantages which the Fund might not otherwise incur or suffer. Units may not be held by any person in breach of the law or requirements of any governmental, statutory authority including, without limitation, Exchange Control Regulations. The Trustee company may, compulsorily redeem any Units held directly or beneficially in contravention of these prohibitions. In view of the individual nature of investment portfolio and its consequences, each Unitholder is advised to consult his/her own professional advisor concerning possible consequences of purchasing, holding, selling, converting or otherwise disposing of the Units under the laws of his/her State/country of incorporation, establishment, citizenship, residence or domicile.</p>
Refund	<p>Refund of subscription money to applicants whose applications are invalid for any reason whatsoever, will be without incurring any liability whatsoever for interest or other sum.</p> <p>The entire amount shall be refunded within a period of 6 weeks. If, the Fund refunds the amount after 6 weeks, interest @15% per annum for delayed period shall be paid by the AMC. Refund orders will be marked "A/c. Payee Only" and drawn in the name of the first applicant.</p>
Dividend Policy	<p>In case of Growth Option the income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving medium to long term and also short term capital growth as reflected in the NAV. In case of Dividend Option the profits received / earned and so retained and reinvested may be distributed as Income, to the unitholders who hold the units on the record date of declaration of the Income, at appropriate rates (after providing for all relevant ongoing expenses, etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. The Income distribution warrants shall be despatched within 30 days of the declaration of the Income. Guided by the philosophy of value-oriented returns, the Trustee Company may periodically capitalise net earnings of the Scheme (including interest income and realised gains on the Securities) by way of allotment/credit of bonus Units to the Unitholders Accounts in either option.</p> <p>The Fund does not assure any targeted annual return / income nor any capitalisation ratio. Accumulation of earnings and / or capitalisation of bonus units and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause "Suspension of Ongoing Sale, Repurchase or Switch of Units."</p> <p>Dividend Reinvestment Option : Unitholders under this Option also have the facility of reinvestment of the income so declared, if so desired. Income Distribution Warrants will not be despatched to such Unitholders. The income declared would be reinvested in the Scheme on the immediately following ex-dividend date.</p> <p>Dividend Sweep Facility Under this facility investor can opt for reinvestment of dividend into any other scheme of Tata Mutual Fund. This facility is available only for those investors who have opted for dividend reinvestment facility. This facility is not available to those investors who have opted for dividend payout facility. Under this facility, the net dividend amount (i.e net of statutory levy / taxes if any) will be automatically invested on the ex dividend date into other scheme of TATA Mutual Fund specified by the investor at the applicable NAV of that scheme & accordingly equivalent units will be allotted in lieu of dividend, subject to the terms of the schemes. The minimum and maximum amount is not applicable for this facility. No entry load or exit load will be levied on the units issued in lieu of dividend. AMC reserves the right to modify or withdraw this facility without prior notice.</p> <p>Default Option: Investor should appropriately tick the 'option' (dividend or growth) in the application form while investing in the schemes. If option is not indicated by the investor, then by default it will be treated as 'growth option'. Further, if investors chooses 'dividend option' then they should also indicate the sub-option (dividend payout or dividend re-investment) under the 'dividend option' otherwise it will, by default, be treated as 'dividend re-investment' option.</p>

C. COMPUTATION OF NAV

Net Asset Value (“NAV”) of the Units shall be determined daily as of the close of each Business Day on which the Bombay Stock Exchange (BSE) is open.

NAV shall be calculated in accordance with the following formula:

$$\frac{\text{Market Value of Scheme's Investments + Accrued Income + Receivables + Other Assets - Accrued Expenses - Payables - Other Liabilities}}{\text{Number of Units Outstanding}}$$

NAV= _____

The computation of Net Asset Value, valuation of Assets*, computation of applicable Net Asset Value (related price) for ongoing Sale, Redemption, Switch and their frequency of disclosure shall be based upon a formula in accordance with the Regulations and as amended from time to time including by way of Circulars, Press Releases, or Notifications issued by SEBI or the Government of India to regulate the activities and growth of Mutual Funds. The NAVs of the fund shall be rounded off upto four decimals.

* Please refer Para V. of SAI on ‘Investment valuation norms for securities & other assets’ for details.

IV. FEES AND EXPENSES

A. NEW FUND OFFER (NFO) EXPENSES

Being an existing scheme provision of NFO expenses are not applicable for this scheme. This scheme was launched on 19th May, 2005. All new fund offer expenses were borne by the scheme and being amortized over the period of five years. Unamortized NFO Expenses as on February 28, 2009 is Rs. 2.97 Crores.

B. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents’ fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated following percentage of the weekly average net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Particulars	% of Net Assets
Investment Management & Advisory Fee	1.25
Custodial Fees	0.18

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations.

The above list of expenses is illustrative only and may include such other expenses as may be permitted by SEBI from time to time.

Investment Management fees charged by TAML shall be 1.25% of the weekly average net assets for net assets upto Rs. 100 crores and 1.00% of the weekly average net assets on the balance amount above Rs. 100 crores. This fee shall be conformity with SEBI Regulations & shall be payable at a frequency as agreed between the AMC and Trustees from time to time. TAML shall not charge any fees on its investment in Units of the Funds/Schemes/Plans in TMF or any other Mutual Fund.

The recurring expenses of the Schemes and the additional management fee shall be as per the limits prescribed under Sub-Regulations (6) of Regulations 52 of the Regulations and shall not exceed the limits prescribed thereunder.

As per the Regulations, the maximum recurring expenses that can be charged to the Scheme shall be subject to a percentage limit of weekly net assets as in the table below:

First Rs. 100 crore	Next Rs. 300 crore	Next Rs. 300 crore	Over Rs. 700 crore
2.50%	2.25%	2.00%	1.75%

TATA MID CAP FUND

The above is the maximum limit under Regulation 52 (6) of the SEBI (Mutual Funds) Regulations, 1996. The Fund will strive to reduce the level of these expenses so as to keep them well within the maximum limits allowed by SEBI and any expenditure in excess of the above limits shall be borne by Tata Asset Management Limited and/or Tata Trustee Company Private Limited.

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.tatamutualfund.com) or may call at (1800-209-0101) or your distributor.

Type of Load (for non SIP transactions)	Load chargeable (as %age of NAV)
Entry	For each Investment amount less than Rs. 2 Crore: 2.25% For each Investment amount greater than or equal to Rs. 2 Crore: NIL
Exit	Nil

Type of Load (for SIP* transactions)	Load chargeable (as %age of NAV)
Entry	2.25%
Exit	If redeemed on or before expiry of 24 months from the date of allotment: 1.00% If redeemed after 24 months: Nil

* The above SIP load structure would be applicable for SIP amount upto Rs 50 Lakhs per installment. For SIP installment above Rs 50 Lakhs the prevailing load structure for investment other than SIP will be applicable.

No entry / exit load shall be charged on the units subscribed by any Fund of Fund Schemes.

Bonus units and units issued on reinvestment of dividends shall not be subject to entry and exit load.

All loads including Contingent Deferred Sales Charge (CDSC) for the Scheme shall be maintained in a separate account and may be utilised towards meeting the selling and distribution expenses. Any surplus in this account may be credited to the scheme, whenever felt appropriate by the AMC.

Trail Fees: The scheme is open for investments by other funds. In case of direct investments made by the other funds into the underlying funds, the distributors of the other funds who mobilize the funds are entitled to the brokerage / trail commission. Accordingly, the brokerage trail commission would be paid from the underlying fund within the overall expenses that are permitted by the regulation. The underlying fund may pay the brokerage / trail commission to the distributor.

The AMC reserves the right to change/modify exit / switchover load (including zero load), depending upon the circumstances prevailing at any given time. However any change in the load structure will be applicable on prospective investment only. The AMC may charge an exit load for switch of units from one plan/option to another plan/option within the Scheme and/or any other scheme of TMF depending upon the circumstances prevailing at any given time. The switchover load may be different for different plans/options and the switchover load may be different from the entry and /or exit load charged for sale and/or repurchase units. The load charged could also be different for different options in the plans of the Scheme at the same time and different as regards the amount/tenor of investment, etc.

As per SEBI circular dt. May 23, 2008, the mutual fund at the time of changing the load structure, the mutual funds may consider the following measures to avoid complaints from investors about investment in the schemes without knowing the loads:

- The addendum detailing the changes may be attached to Scheme Information Documents and Key Information Memorandum. The addendum may be circulated to all the distributors/brokers so that same can be attached to all Scheme Information Documents and Key information memoranda already in stock.
- The investor is requested to check the prevailing load structure of the scheme before investing. For any change in load structure arrangement may be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centers and distributor/ brokers' office.
- The introduction of the exit load/ CDSC along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load/CDSC.
- A public notice shall be given in respect of such changed in one English daily newspaper having nationwide circulation as well as in a newspaper publishes in the language of region where the Head office of Mutual Fund is situated.

D. WAIVER OF LOAD FOR DIRECT APPLICATIONS

No entry load shall be charged for direct applications (for fresh subscription, as additional subscription by the existing investors and switch applications) received by the AMC i.e applications received through internet or applications accepted at the offices of AMC or authorised investor service Centres that are not routed through any distributor or agent/broker. Such applications may be marked DIRECT or NOT APPLICABLE in the broker code column of the application form/transaction slip. In case of any change in the broker code column, the investor has to strike off the earlier entry, enter the new code (DIRECT, NOT APPLICABLE OR BROKER CODE) and the same has to be counter signed. Application / Transaction slip for subscription or switch in without mention of broker code or where the broker code column is blank, shall be treated as direct application.
