About the Fund

- The investment objective of the fund is to generate regular income/appreciation over the short to medium term.
- The Fund endeavors to create a liquid portfolio of debt as well as money market instruments to provide reasonable returns and liquidity to investors.

Fund Commentary

The portfolio's performance with respect to the benchmark in the past year can be attributed to the average maturity, higher allocation to corporate bonds, Government securities and quality of the portfolio.

Since Jan-21, the fund has reduced its average maturity from the ~3-year levels to 2-year levels in June-21 as yields have risen across maturities. In the past 6 months, the fund maintained a significantly higher allocation to G-Secs compared to the benchmark. The portfolio had overweight positions in CDs and while being underweight in CPs.

The fund was under-weight in AAA papers, however, with greater exposure to PSU papers. This caused fund YTM to be lower the fund invested in papers with relatively lower credit risk. The overweight position in money market instruments had a positive impact on the fund performance.

Due to second wave of Covid-19, Rate hike expectation have been pushed into next financial year provided we do not have a severe third wave and we are able to vaccinate majority of the population. The fund manager has reduced maturity and duration as yields have risen.

The RBI governor has indicated that premature withdrawal of accommodative monetary policy stance can reverse the trepid growth momentum which has built up in the economy.

*Based on current market scenario. Strategy is subject to change without notice.

Allocation to G-Secs in the Portfolio

RBI has been conducting Government Securities Acquisition Program (GSAP)/OMO operations to keep interest rates low. RBI Governor has stated he will do both unconventional and conventional policy to keep interest rates low to support economic growth.

G-Sec yields are expected to remain stable on the basis of RBI's stated intention to ensure orderly evolution of the G-Sec curve and reduce volatility to ensure a stable rate structure. RBI Governor has endeavored to support the government's borrowing program. RBI has now bought ~65% of the benchmark 10-year G-Secs since the inauguration of the G-SAP. As longer term and shorter-term yields are expected to remain stable due to government intervention, the fund holds a ~29% position in SOV papers which is significantly higher than the benchmark.

Investment in Tata Short Term Bond Fund- Rationale

- The scheme has a duration band of 1 to 3 Macaulay duration. This converts into a maximum average maturity of 3.8 years. The Fund has a high-quality portfolio currently heavy towards G-Secs with respect to the portfolio.
- Maturities are biased towards high quality and 0-5-year papers. The fund is biased towards safer instruments given domestic and global uncertainties.
- The fund is positioned to predominantly generate accrual returns from high quality bonds and G-Secs

Movement of Yields and Spreads: December-2020 to June-2021

Yield Movements

- Corporate yield curve had an upward shift of 45-75 bps with 3-7 year seeing more significant movement
- G-Sec Yields curve moved upwards sharply in 3–7-year segment by 45-85 bps. 10-year segment saw modest upward shift of ~15 bps.

Spread Movements

- Spreads widened in the 1- and 10-year segments by ~30-45 bps and by ~25 bps in the 5-year segment.

Debt Outlook

- The recovery of the Indian economy seems to be pushed back due to the second wave of the pandemic, which has seen record level of infections and deaths. 40 % to 50 % of the population is likely to get vaccinated in the next 6 months, in the best-case scenario.
- We expect RBI to intervene decisively, especially in the short end of the yield curve to support bond prices.
- RBI would like to be sure of growth impulses getting firmly entrenched before it starts withdrawing its accommodative monetary policy stance. RBI would also like to guard against the third wave of covid in India which has engulfed countries like Australia, UK.
- Global macro-economic environment continues to be growth positive, with most advanced economy expected to start withdrawing monetary accommodation from next year onwards. The US is expected to at the forefront with Federal Reserve expected to hike rates in the second half of 2023.
- Additional borrowing for GST compensation cess and stimulus package announced by the government is expected to happen in less than 7-year segment.
