FUND OVERVIEW

The Tata India Tax Savings Fund is an open-ended equity linked tax saving scheme (ELSS) with a compulsory lock-in period of three years. It has the advantage of Tax Benefit under Section 80C of the Income Tax Act along with an opportunity to catch the long-term upside potential of the Indian equity market.

The portfolio strategy focuses on well managed, high quality companies with above average growth prospects that can be purchased at a reasonable price. Typically these companies will be highly competitive, with a large and growing market share.

WHY TATA INDIA TAX SAVINGS FUND

The 3 years lock-in period allows the Fund Manager to take long term call on stocks not withstanding short term volatility in the market for exploiting true wealth creation potential of stocks.

Blend of both 'value' and 'growth' style of investing in one portfolio across market capitalization segments.

Focus on well managed, good quality, fundamentally strong companies with above average growth prospects.

PORTFOLIO CONSTRUCTION

Compounders

Businesses that have a long runway for growth and have some sort of market leadership in their product category (in terms of volumes, revenues, costs/profits per unit or in terms of Return on Capital, etc). These companies are also likely to show consistency in generating profits and have a capable management team and prudent capital allocation policies. Re-Rating Opportunities

Re-Rating Opportunities

These are businesses that are currently underestimated by the market for various reasons. They could be cyclical businesses which the markets believe are in a downcycle, while there are indications of a recovery. They could be companies undergoing a transformation within the business due to a change in management or policy. Investment opportunities could also arise due to a change at the industry level due to consolidation or a change in the demand and supply dynamics. There is the potential for the market to re-rate the valuations of the companies and correct its underestimation.

HIGHLIGHTS

01

GO ANYWHERE

A Diversified portfolio that shifts across market caps
