I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of units of the scheme may go up or down.
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- Investment in equity and equity related securities including option contracts involve high degree of risks and investors should not invest in the schemes unless they can afford to take the risk of losing their investment.
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- Tata Nifty India Digital Exchange Traded Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the scheme carefully and consult their Tax and Investment Advisor before investing in the Scheme.
- Tata Nifty India Digital Exchange Traded Fund is not guaranteed or assured return scheme.

Scheme Specific Risk Factors:

Tata Nifty India Digital Exchange Traded Fund will be a passively managed scheme by providing exposure to Nifty India Digital Index and tracking its performance and yield, before expenses, as closely as possible. The scheme performance may be affected by a general decline in the Indian markets relating to its underlying Index. The scheme invests in the underlying Index regardless of its investment merit.

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index, generally known as "Tracking Error" risk.

The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. ETFs in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. However, Tracking Error of ETFs is likely to be low as compared to a normal index fund.

To the extent that some assets/ funds may be deployed in Debt/Money Market Operations, the Scheme will be subject to risks relating to such deployment / operations and may also contribute to tracking errors.

In case of investments in derivative instruments like index futures, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is an untested market.

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives. These risks are associated with investment in equities.

Risks associated with investments in equity instruments

Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilising debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Regulatory Risk

Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker to arbitrage resulting into wider premium/ discount to NAV.

Liquidity Risk

Trading in units of Tata Nifty India Digital Exchange Traded Fund on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units of Tata Nifty India Digital Exchange Traded Fund are subject to trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of Tata Nifty India Digital Exchange Traded Fund will continue to be met or will remain unchanged. The Trustee, in the general interest of the unit holders of the Scheme offered under this scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.

Settlement Risk

In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Schemes portfolio may result, at times, in potential losses to the Schemes, and there can be a subsequent decline in the value of the securities held in the respective Scheme's portfolio.

Risk pertaining to Nifty India Digital Index

Nifty India Digital Index is a thematic index and there will be high concentration of securities which are part of Digital Theme/Sector(s). The scheme is subject to the risks associated with such Digital Theme/Sector(s). In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity Securities. Such risks may impact the Scheme to the extent that it invests in particular sectors even in cases where the investment objective is more generic.

Risks associated with Debt/Money Markets Instruments

Interest Rate Risk

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

As with money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, SEBI circular no MFD/CIR/01/047/99 dated February 10, 1999,framework for short selling and borrowing and lending of securities notified by SEBI circular no MRD/DoP/SE/Cir-14/2007 dated December 20, 2007 and SEBI circular no SEBI / IMD / CIR No 14 / 187175/ 2009 dated December 15, 2009 and SEBI circular no CIR/MRD/DP/122/2017 dated November 17, 2017. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 20% of the net assets of the Scheme can be deployed in stock lending and not more than 5% of the fund can be can be deployed in Stock lending to any single intermediaries. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the scheme would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same.(In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Listing related risks

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged. Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme. However, the Units of the Scheme can be subscribed / redeemed in Creation Unit Size directly with the Fund, which provides efficient arbitrage between the traded prices and the NAV, thereby reducing the incidence of the units of the Scheme being traded at premium/discounts to NAV. However, any changes in the trading regulations by NSE/Stock Exchange/SEBI may affect the ability of the market makers to arbitrage resulting into wider premium or discount to NAV. The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

The market price of the Units of the Scheme, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the Unit (or NAV), and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV.

Risks associated with Segregated Portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Redemption Risk

Investors may note that even though this is an open-ended scheme, the Scheme would repurchase/redeem Units in Creation Unit Size only. Thus unit holdings less than the Creation Unit Size can only be sold through the secondary market on the Stock Exchange where these units are listed, subject to the rules and regulations of the Exchange.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk Control:

The scheme aims to track the Nifty India Digital Index as closely as possible before expenses. The index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.

Investment in equity has an inherent market risk which cannot be mitigated generally. Whilst such risks cannot be eliminated, they may be mitigated by diversification. The AMC has adequate safeguards for controlling risk in the portfolio construction process. Investments made by the Scheme would be in accordance with the investment objective of the Scheme and provisions of SEBI Regulations.

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open-ended Exchange Traded Fund replicating / tracking Nifty India Digital Index.

B. INVESTMENT OBJECTIVE OF THE SCHEME

The investment objective of the scheme is to provide returns that corresponds to the total returns of the securities as represented by Nifty India Digital Index, subject to tracking error.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved.

How the fund is different from other existing schemes of Tata Mutual Fund:

Tata Nifty India Digital Exchange Traded Fund, an open-ended exchange traded fund is thematic sectorial exchange traded fund and not a minor modification of any other existing scheme/ product offered by Tata Mutual Fund. The scheme is a passively managed exchange traded fund. Currently, Tata Mutual Fund has only two Exchange Traded Fund i.e. Tata Nifty Exchange Traded Fund, Tata Private Bank Exchange Traded Fund.

Below mentioned is the comparison of this fund with other existing scheme/s in the same category of Tata Mutual Fund:

Scheme Name	Asset Allocation Pattern	Primary Investment Focus	AUM as on 31 st August '2022 (Rs. Crore)	No. of Folios as on 31 st August '2022
Tata Nifty Exchange Traded Fund	95%-100% in Equity and Equity related instruments covered by Nifty 50 index and 0-5% in Money Market Instruments including Tri-Party Repo or any other instrument as may be permitted by SEBI and units of liquid scheme of Tata Mutual Fund	Primarily a passively managed exchange traded fund mirroring Nifty 50. At present we do not have other similar scheme.	449.48	4704
Tata Nifty Private Bank Exchange Traded Fund	95%-100% in Equity and Equity related instruments covered by Nifty Private Bank index and 0-5% in Money Market Instruments including Tri-Party Repo or any other instrument as may be permitted by SEBI and units of liquid scheme of Tata Mutual Fund.	Primarily a passively managed exchange traded fund mirroring Nifty Private Bank Index. At present we do not have other similar scheme.	13.94	2108

C. ASSET ALLOCATION AND RISK PROFILE

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Equity and Equity related instruments which are part of Nifty India Digital Index*	95	100	High
Debt & Money Market Instruments including units of Mutual Funds.	0	5	Low

The net assets of the scheme will be invested in stocks replicating /constituting Nifty India Digital Index. The scheme will endeavours to invest in all the stocks in the same weightage that they represent in the underlying Index. A small portion of the net assets will be invested in debt and money market instruments to meet the liquidity requirements of the Scheme.

*The exposure to derivatives will be restricted upto 20% of its net assets. Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. The rebalancing in such cases will be done within the stipulated time as mentioned in 'change in investment pattern' para. The cumulative gross exposure through equity, debt, money market instruments and derivative positions shall not exceed 100% of the net assets of the scheme. The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives from time to time.

As per clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations 1996, the scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

The Scheme shall not carry out short selling. The scheme may engage in securities lending and borrowings. Not more than 20% of the net assets of the Scheme can be deployed in stock lending and not more than 5% of the fund can be deployed in stock lending to any single intermediary. The Scheme will also not invest in foreign securities and securitized debt.

The Scheme shall not invest in Credit default Swaps and in debt instruments having structured obligations / credit enhancements.

Change in Investment Pattern

Investment strategy and pattern may be deviated from time to time. In case of deviation, the AMC will achieve a normal asset allocation pattern in a maximum period of 7 days. In case deviation in investment pattern is not rebalanced within the period indicated above then justification for such delay in rebalancing of portfolio shall be placed before the investment committee and the reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

Rebalancing period

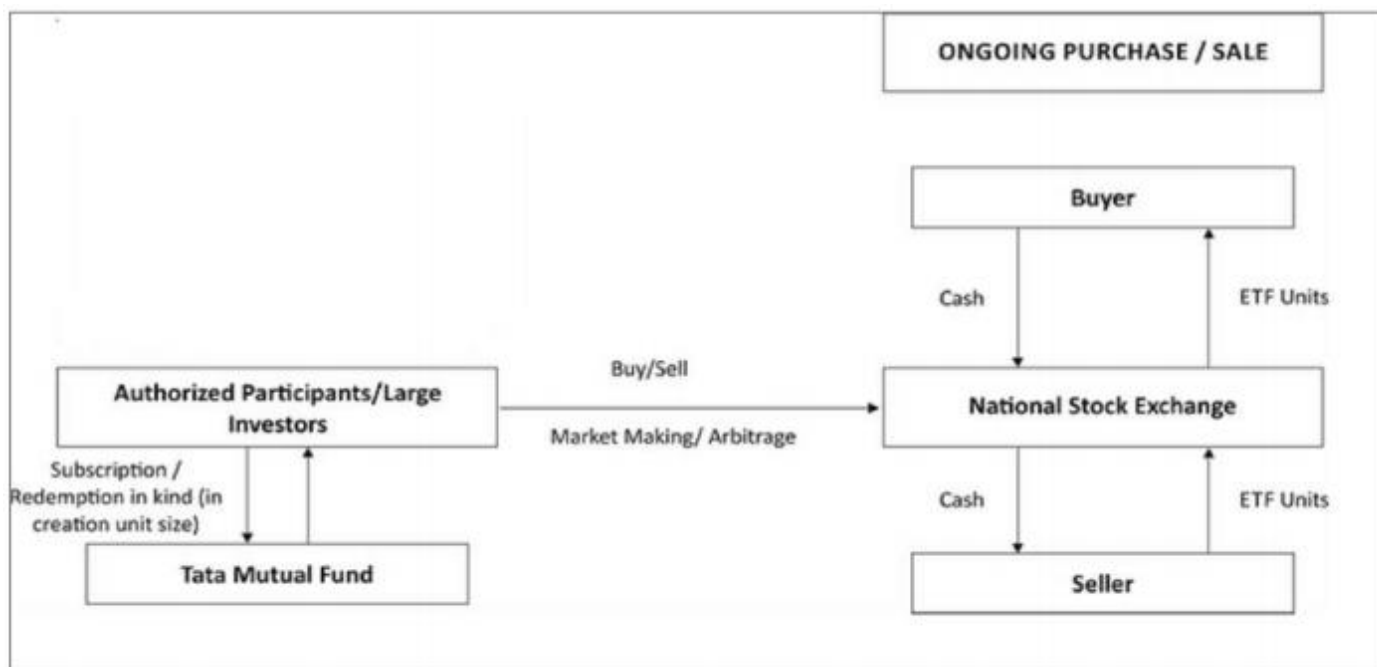

In case of change in constituents of the index due to periodic review, the portfolio of equity ETF/ Index Funds be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio of ETF in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

INTRODUCTION TO EXCHANGE TRADED FUNDS

An ETF is a passively managed product that provides exposure to an index or a basket of securities with the objective of generating returns as close to the index as possible. The key benefit of an ETF over traditional open-ended index funds is liquidity and availability of real-time market price on stock exchange. They can be bought and sold on the exchange at prices that are usually close to the indicative intra-day NAV of the Scheme. ETFs provide investors a fund that closely tracks the performance of an index with the ability to buy/sell on an intra-day basis. ETFs are structured in a manner which allows to create new units (called creation units) and redeem outstanding units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

Eligible investors as per SEBI Circular No. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated 23.05.2022 can purchase units by depositing the underlying securities with the mutual fund/AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange. ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

How ETF's Works:

Benefits of ETFs

- Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
- Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at nearly the real-time prices as opposed to end of day prices.
- Ability to put limit orders.
- Protects long-term investors from the inflows and outflows of short-term investors. This is because the fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.
- Flexible as it can be used as a tool for gaining instant exposure to the equity markets, securitize cash, for arbitraging between the cash and futures market.
- Tracking error is likely to be low compared to normal index fund due to lower expenses and the unique in kind redemption and creation process of units.

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

D. WHERE WILL THE SCHEME INVEST

Equity & Equity Related Instruments: The Scheme would invest in stocks comprising Nifty India Digital Index in the same proportion (weightage) as in the Index.

Investment in Debt & Money Market Instruments: The Scheme may also invest in Money market instruments, in compliance with Regulations to meet liquidity requirements. The scheme may also invest in liquid schemes of Tata Mutual Fund or of any other fund house.

Money Market Instruments includes instruments like Commercial Paper, Certificate of Deposit, Treasury Bills and short term debt instruments etc. Triparty Repo or any other instrument as may be permitted by SEBI, Reverse Repo in Government Securities and any other Money Market instruments as may be permitted by SEBI/ RBI from time to time.

Derivatives and Hedging Products:

The Scheme may invest in Derivative Instruments to the extent permitted under SEBI Circulars DNPD/Cir-29/2005 dated September 14, 2005, DNPD/Cir-29/2005 dated January 20, 2006, SEBI/DNPD/Cir-31/2006 dated September 22, 2006 and CIR/IMD/DF/11/2010 dated August 18, 2010 & SEBI/HO/IMD/DF2/CIR/P/2017/109 dated September 27, 2017.

The cumulative gross exposure through equity, debt, money market instruments and derivative positions should not exceed 100% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

An option contract may be of two kinds:

Call option: An option that provides the buyer the right to buy is a call option. The buyer of the call option can call upon the seller of the option and buy from him the underlying asset at the agreed price. The seller of the option has to fulfill the obligation upon exercise of the option.

Put option: The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Option contracts are classified into two styles:

European Style

In a European option, the holder of the option can only exercise his right on the date of expiration only.

American Style

In an American option, the holder can exercise his right anytime between the purchase date and the expiration date.

E. THE INVESTMENT STRATEGIES

Tata Nifty India Digital Exchange Traded Fund is a passively managed exchange traded fund which will employ an investment approach designed to track the performance of Nifty India Digital Index. The Scheme seeks to achieve this goal by investing in securities constituting the underlying Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index which have been identified as companies benefitting from the digital transformation and new age technology provider in the same weightage as in the Nifty Digital Index.

The Scheme may also invest in debt and money market instruments to meet the liquidity and expense requirements.

The Fund will be a diversified Index based fund which will invest predominantly in equity and equity related securities identified with focus on growth opportunities provided by emerging technology and internet companies like Online shopping, Food delivery, Travel Management, Gaming, Cloud computing, Fintech & Edu-tech companies etc.

Tracking Error

Tracking error is a measure of the difference in returns from the Scheme and the returns from the index. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis.

Tracking error could be the result of a variety of factors including but not limited to:

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

- Delay in the purchase or sale of stocks within the benchmark due to:
 - i) Illiquidity in the stock,
 - ii) Delay in realisation of sale proceeds,
- The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Investment in Debt and money market instruments to meet redemption / other liquidity requirements
- Addition or Removal of stocks from the index by index service provider
- Disinvestments to meet redemptions, recurring expenses, income distribution cum capital withdrawal payouts etc.
- Execution of large buy / sell orders
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

The Scheme will endeavor to minimise the tracking error by:

- Rebalancing of the portfolio.
- Setting off of incremental subscriptions against redemptions.

The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

For ETFs in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Trading in Derivatives by the Scheme

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. In accordance with the guidelines issued by the SEBI, exposure to derivative instruments will be restricted to the limit as specified in the para on asset allocation pattern of the scheme.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc.

The Scheme may use techniques and instruments such as trading in derivative instruments. A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc. The Scheme may purchase call and put options in securities in which it invests and on securities indices based on securities in which the scheme invests. Through the purchase and sale of futures contracts and purchase of related options on those contracts the Scheme would seek to hedge against a decline in securities owned by the Scheme or an increase in the prices of securities which the Scheme plans to purchase. The Scheme would sell futures contracts on securities indices in anticipation of a fall in stock prices, to offset a decline in the value of its equity portfolio. When this type of hedging is successful, the futures contract increase in value while the Scheme's investment portfolio declines in value and thereby keep the Scheme's net asset value from declining as much as it otherwise would. Similarly, when the Fund is not fully invested, and an increase in the price of equities is expected, the Scheme would purchase futures contracts to gain rapid market exposure that may partially or entirely offset increase in the cost of the equity securities it intends to purchase.

Example: Please note that below mentioned examples are purely for illustration purpose only and actual exposure may vary to a greater extent in line with the regulatory directives.

Derivative Instruments & Related Examples:

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

In Addition to the above, SEBI has also prescribed following derivative position limits:

Position Limits for Mutual Fund and its scheme:

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
	Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
Position limit for Stock Options and Stock Futures contracts	
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).	
This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.	

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

- For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
- This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all scheme put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

Portfolio Turnover

Being Exchange Traded Fund, the fund Manager will follow passive strategy while investing. The portfolio turnover is expected to be in line with the volume of subscription and redemption in the scheme on a daily basis by Market Maker and eligible investors as per SEBI Circular No. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated 23.05.2022. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

Portfolio Turnover Ratio as on 31st August 2022 (for 13 months) is 0.18 Times.

G. SCHEME BENCHMARK

Scheme Benchmark – Nifty India Digital Index (TRI)

Suitability of the index:

Nifty India Digital Index is the index being developed by NSE Indices Limited. Index constituents and their weights in the index will be decided by NSE Indices Limited. NSE Indices Ltd will also calculate the index value on a daily basis.

The spend on the digital transformation has gathered pace over the last 2 years and is now cutting across businesses, economic activities and various consumption chains. The traditional players are being challenged by the new age companies which are re-imagining businesses or the modes of delivery of various goods and services. The new age companies are not only benefiting from availability of risk capital but have also seen higher penetration and wider acceptance by the customers due to the pandemic. The digitalization is still in the early stages as more new age companies are likely to achieve scale, raise capital and get listed over the next 3-5 years. As this transformation unfolds and the new age companies become a more prominent part of the economy and equity markets, there is a need to capture the trend/ change. Nifty India Digital Index is designed to reflect the behavior and performance of the emerging technology and internet companies like Online shopping, Food delivery, Travel Management, Gaming, Cloud computing, Fintech & Edu-tech companies etc. The index will comprise of 30 stocks.

The underlying index will be computed using free float methodology. The methodology also takes into account constituent changes in the index and corporate actions such as stock splits, rights issuance, etc., without affecting the index value.

Considering the scheme is a passively managed exchange traded fund, Nifty India Digital Index will be an ideal benchmark for the scheme and is most suitable for performance composition. Total Return variant of the index (TRI) of the index will be used for performance comparison.

The above instances will be tracked by on a continuous basis and in case if any of the above-mentioned scenario arises, the same will be disclosed on the website of Tata AMC.

Market Makers (MMs)

In order to make the market making process less capital intensive, SEBI has allowed net settlement between cash leg of transactions in units of ETF by the MM and consequent transaction in underlying basket by the ETF.

Under this mechanism, ETFs are allowed to buy and sell their own units them being the part of asset allocation.

Other Considerations:

- (a) As mandated by SEBI, AMC will appoint at least two Market Makers (MMs), to provide continuous liquidity from Stock Exchange platform.
- (b) Tata AMC will facilitate in-kind creation and redemption of units of ETFs by MMs on a best effort basis.
- (c) Incentives, if any, shall be charged to the scheme withing the maximum permissible TER limit.
- (d) The principles of incentive structure to MM (as and when decided) will be disclosed on <https://www.tatamutualfund.com/>

Incentives, if any, to market maker will be linked to performance of the market maker in terms of generating liquidity in units of ETFs.

Determination of incentive for Market maker:

It will be determined based on any or all of the below mentioned criteria:

- I. volume carried out by market maker on the exchange as compared to total volume of respective ETFs on exchange.
- II. Spread between the two way quote (bid ask spread)

Incentive may be fixed monthly compensation or performance-based or transaction based.

Incentives to market maker shall be at the discretion of the AMC & to be decided between the AMC and the MM which may be variable in nature or fixed amount adhering to maximum permissible limit of TER.

Incentives, if any, will be payable to MM subject to MM fulfilling its obligations and responsibilities.

The role of market makers (MMs) is to offer liquidity of the units of the scheme on the Stock Exchange where the units are listed. MM's may offer to buy and sell quotes (bid and ask quotes) on the exchanges such that buy and sell orders get executed in the market subject to price compatibility. Market Maker(s) may for the purpose of creating liquidity subscribe or redeem the units of the scheme directly with the Mutual Fund.

Details of the market makers will be updated on the website of Tata Mutual Fund.

The AMC reserves right to appoint / remove any Market Makers (MM's).

SEBI circular No. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated 23.05.2022 on "Development of passive funds". were to be applicable with effect from 01.07.2022. Clause 2(IV)(A) of the aforesaid circular prescribed that in respect of units of ETFs, direct transaction with AMCs shall be facilitated for investors only for transactions above a specified threshold. However, as per SEBI circular SEBI/HO/IMD/DF2/CIR/P/2022/102 dated 28.07.2022, applicability of clause 2(IV)(A) of the circular shall be 01.11.2022.

Cut off timing for redemptions (sale) and switch outs (to other schemes / plans of the mutual fund) by investor.

This is the time before which your application (complete in all respects) should reach the official points of acceptance.

The requirement of "cut-off" timing for NAV applicability as prescribed by SEBI from time to time shall not be applicable for direct transaction with AMC in the Scheme by MMs and other eligible investors in Creation Unit Size.

For Redemption transaction in less than Creation Unit Size in the exceptional circumstances mentioned in clause 'Ongoing price for redemption (sale) / repurchase / by investors.'

The following cut-off timings shall be observed by the Mutual Fund

1. where the application received upto 3.00 pm – closing NAV of the day of receipt of application; and
2. an application received after 3.00 pm – closing NAV of the next business day.

The Scheme is listed and traded on the NSE or will be listed on other stock exchange, the provisions of cut off time (3 P.M.) is not applicable for secondary market transactions but will be subject to the trading time/restrictions for purchase/sale of units as per the rules and regulations prescribed by the stock exchanges on which they are listed.

Settlement of purchase / sale of Units of the Scheme on NSE and/or any other stock exchange:

Buying/Selling of Units of the Scheme on NSE and/or any other stock exchange is just like buying/selling any other normal listed security. If an investor has bought Units, an investor has to pay the purchase amount to the broker/sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the Stock Exchange(s). If an investor has sold Units, an investor has to deliver the Units to the broker/subbroker before the securities pay in day of the settlement cycle on the Stock Exchange(s). The Units (in the case of Units bought)

SID-TATA NIFTY INDIA DIGITAL EXCHANGE TRADED FUND

and the funds (in the case of Units sold) are paid out to the broker on the pay-out day of the settlement cycle on the Stock Exchange(s). The Stock Exchange(s) regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for 'Delivery-In' to his /her/its DP for accepting Units in his/her/its beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her/its DP to his/ her/its trading member. The trading member will transfer the Units directly to his/her/ its beneficiary account on receipt of the same from NSE's and/or any other stock exchange's Clearing Corporation.

An investor who has sold Units should instruct his/her/its Depository Participant (DP) to give 'Delivery Out' instructions to transfer the Units from his/her/its beneficiary account to the Pool Account of his/her/its trading member through whom he/she/it have sold the Units. The details of the Pool A/C (CMBP-ID) of his/her trading member to which the Units are to be transferred, Unit quantity etc. should be mentioned in the Delivery Out instructions given by him/her to the DP. The instructions should be given well before the prescribed securities pay-in day. SEBI has advised that the Delivery Out instructions should be given at least 24 hours prior to the cut-off time for the prescribed securities pay-in to avoid any rejection of instructions due to data entry errors, network problems, etc.

Rolling Settlement

As per the SEBI's circular dated March 4, 2003, the rolling settlement on T+2 basis for all trades has commenced from April 1, 2003 onwards.

The pay-in and pay-out days for funds and securities are prescribed as per the Settlement Cycle. A typical Settlement Cycle of Rolling Settlement is given below:

T	The day on which the transaction is executed by a trading member
T+1	Confirmation of all trades including custodial trades.
T+1	Processing and downloading of obligation files to brokers/custodians.
T+1	Pay-in of funds and securities.
T+2	Pay out of funds and securities.

While calculating the days from the Trading day (Day T), weekend days (i.e. Saturday and Sundays) and bank holidays are not taken into consideration.

Where can the applications for redemption and switch out be submitted?

Compliance under Foreign Account Tax Compliance Act (FATCA) regulations:

United States of America (US) has introduced chapter no. 4 in the US Internal Revenue Code as a part of the Hiring Incentives to Restore Employment (HIRE) Act, which was enacted by the US legislature to create employment opportunities in US. The HIRE Act includes Foreign Account Tax Compliance Act (FATCA), which now forms a part of the US-IR Code. The regulations for FATCA have undergone revision since 2010 and the final regulations make the FATCA provisions effective from July 1, 2014.

The objective of FATCA is to detect "US Persons", who evade US taxes by using financial account maintained outside US. The US persons are defined as those who have either US citizenship or US residency. The FATCA stipulates reporting on -

- i. US taxpayers about certain foreign financial accounts and offshore assets.
- ii. Foreign Financial Institutions (FFIs) about financial accounts with them of US taxpayers or foreign entities in which US taxpayers hold substantial ownership interest.

FFIs (including mutual funds in India) are required to periodically report information on accounts of US persons, who maintain balances above a threshold. In the event of a default in the reporting of information on accounts of US taxpayers, a withholding of 30% of the payment made from US sources will be imposed on the recalcitrant account holders and non-participating Financial Institutions. SEBI vide its circular no. CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. Tata Asset Management Pvt Limited (TAMPL) is classified as a Foreign Financial Institution (FFI) under the FATCA provisions and in accordance therewith, the AMC would be required to comply with the rules & regulations of FATCA, from time to time.

In order to ensure compliance with FATCA and other rules / directions / notifications as may be issued by Government of India or other regulatory authority, Mutual Funds are required to institute a process to identify US Person investors and report the same.

Applicants are required to refer to the "FATCA information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.

Common Reporting Standard (CRS):

On similar lines of FATCA, the Organization of Economic Development (OECD), along with the G 20 countries, of which India is a member, has released a 'Standard for Automatic Exchange of Financial Account Information in Tax matters'. In order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, the G 20 & OECD countries have together developed a common reporting standard(CRS) on automatic exchange of information(AEOI). On June 3,2015 India has joined the Multilateral Competent Authority Agreement(MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the 'source' jurisdiction to collect and report information to their tax authorities about account holders 'resident' in other countries. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest in the 'resident' countries.

In view of India's commitment to implement the CRS on AEOI and also the IGA with USA and with a view to provide information to other countries necessary legislative changes has already been made in Finance Act & by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the reportable accounts.

Applicants are required to refer to the "FATCA/CRS information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.

With the change in guidelines, investors may be called for additional information required by the law. Investors are requested to keep Mutual Fund updated with change in information already submitted by them with Mutual Fund. FATCA provisions are relevant not only at on-boarding stage of investor(s)/unit holder(s) but also throughout the life cycle of investment with the Fund/the AMC. In view of this, Investors should immediately intimate to the Fund/the AMC, in case of any change in their status with respect to FATCA/CRS related declaration provided by them previously.

Investors(s)/Unit holder(s) should consult their own tax advisors to understand the implications of FATCA/CRS provisions /requirements.

With the change in guidelines, investors may be called for additional information required by the law. Investors are requested to keep Mutual Fund updated with change in information already submitted by them with Mutual Fund.

Applicants who cannot Invest.

- A person who falls within the definition of the term "U.S" Person" under the US Securities Act of 1933 and corporations or other entities organised under the laws of the U.S.

FPI may pay their subscription amounts either by way of inward remittance through normal banking channels or out of funds held in Foreign Currency Account or Non-resident Rupee Account maintained with a designated branch of an authorized dealer with the approval of the RBI subject to the terms and conditions set out in the aforesaid notification.

Mode of payment on Non-Repatriation basis

In case of NRIs/Persons of Indian origin seeking to apply for Units on a non-repatriation basis, payments may be made by cheques/demand drafts drawn out of Non-Resident Ordinary (NRO) accounts/ Non-Resident Special Rupee (NRSR) accounts and Non-Resident Non-Repatriable (NRNR) accounts payable at the city where the Application Form is accepted.

Refunds, interest and other distribution (if any) and maturity proceeds/repurchase price and /or income earned (if any) will be payable in Indian Rupees only. The maturity proceeds/repurchase value of units issued on repatriation basis, income earned thereon, net of taxes may be credited to NRE/FCNR account (details of which should be furnished in the space provided for this purpose in the Application Form) of the non-resident investor or remitted to the non-resident investor by way of Indian Rupees converted into US dollars or into any other currency, as may be permitted by the RBI, at the rate of exchange prevailing at the time of remittance and will be dispatched through Registered Post at the unitholders risk. The Fund will not be liable for any loss on account of exchange fluctuations, while converting the rupee amount in US dollar or any other currency. Credit of such proceeds to NRE/FCNR account or remittance thereof may be permitted by authorized dealer only on production of a certificate from the Fund that the investment was made out of inward remittance or from the Funds held in NRE/FCNR account of the investor maintained with an authorized dealer in India. However, there is no objection to credit of such proceeds to NRO/NRSR account of the investor if he so desires.

Subscription by Multilateral Funding Agencies, on full repatriation basis, is subject to approval by the Foreign Investment Promotion Board.

Restriction on Acceptance of Third Party Payments for Subscription of units of schemes:

Application with third party cheque / third party bank account will be rejected except following which allowed under extant regulations / AMFI Guidelines.

a) Payment by Employer on behalf of employee through Payroll deductions. or deductions out of the expense reimbursements or in lieu of other payments. , AMC shall take extra due diligence in terms of ensuring the authenticity of such arrangements from a fraud prevention & KYC perspective.

b) Custodian on behalf of an FII/FPI or a client.

existence.in addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.

- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

Taxation

The information is provided for general information only. However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors with respect to the specific amount of tax and other implications arising out of his or her participation in the Scheme.

As per the Explanation to Section 115T of Income Tax Act 1961, an equity oriented fund is defined as a fund whose investible funds are invested in equity shares of domestic companies to the extent of more than 65% of the total proceeds of such fund. The percentage of equity share holding of the fund shall be computed with reference to the annual average of the monthly average of the opening and closing figures.

The Finance Act, 2020 abolished income distribution tax and instead introduced taxing of income from mutual fund units in the hands of the unit holders.

Type of Investor	Withholding Tax Rate
Resident	10%*
NRI	20%**

* Tax not deductible if dividend income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge
