##### Scheme Specific Risk Factors:

###### Risks associated with investments in Units of Mutual Fund schemes

The Scheme will invest in Tata Nifty India Digital Exchange Traded Fund. Hence the performance of the Scheme would depend upon the performance of the underlying scheme. Any change in the investment policies or fundamental attributes of the underlying scheme will affect the performance of the Scheme. Investment in the exchange traded fund will have all the risks associated with the equity markets including price risk, credit risk and reinvestment risk. Periodical rebalancing could result in higher transaction costs. This being a Fund of Funds scheme, the investors are bearing the recurring expenses of the scheme in addition to the expenses of underlying scheme in which the scheme shall make investment. However, in line with the SEBI Regulations, the total expense ratio of the Scheme including weighted average of the total expense ratio levied by the underlying scheme shall not exceed the eligible percent of the daily net assets of the Scheme.

**Concentration Risk of Investing in Specific Theme:** Where investment is made in one or in a limited number of market sectors/theme, underlying scheme may be more volatile than other more diversified schemes. The companies within these theme/sectors may have limited markets, or financial resources, or may depend on a limited management group. Such Schemes may also be subject to rapid cyclical changes in investor activity, regulatory changes and / or the supply of and demand for specific products and services.

###### Risk associated with Fund of Fund schemes:

- The Scheme's performance will depend upon the performance of the Underlying Fund.
- Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme.
- The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in debt and money market instruments.
- The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invest. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme in which Fund of Funds scheme invest in. Details of underlying fund is available on [www.tatamutualfund.com](http://www.tatamutualfund.com).
- Dependence on the Investment Managers of the underlying scheme: The success of the underlying scheme depends on the ability of the respective Investment Managers to develop and implement investment strategies that achieve their investment objective. Moreover, subjective decisions made by the Investment Manager may cause an underlying scheme to incur losses or to miss profit opportunities.
- As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors may obtain by directly investing in such schemes.
- As the Fund of Funds scheme will invest into an underlying scheme, the expense charged being dependent on the structure of the underlying scheme (being different), it may lead to a non- uniform charging of expenses over a period of time
- The fund of funds scheme may have different returns/performance than the underlying scheme due to various reasons. The return of the Fund of Funds may be adversely impacted by total expense ratio, cash drag, timing and pricing difference between the subscription/redemption in the Fund of Funds v/s underlying scheme, operational and transactional reasons etc

## TATA NIFTY INDIA DIGITAL ETF FUND OF FUND

- The Fund of Funds scheme may invest in the underlying ETF through stock exchange, where market price of underlying ETF may be different from its Indicative Net Asset Value (INAV)/NAV. This may affect the performance of the scheme.
- The subscription and redemption in Fund of Funds scheme is also dependent on the liquidity of the underlying scheme. The illiquidity of the same may affect the performance of the Fund of Fund scheme.

### Risks associated with investments in equity instruments by underlying scheme

The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invests.

#### Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilizing debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

#### Risk associated with underlying ETFs:

- **Index-Related Risk.** There is no guarantee that the underlying ETF's investment results will always have a high degree of correlation to those of the Underlying Index or that the underlying ETF will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the underlying ETF's ability to completely mirror the portfolio with underlying index constituents. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the underlying ETF. Unusual market conditions may cause the Index Provider to postpone a scheduled rebalance, which could cause the Underlying Index to vary from its normal or expected composition
- **Passive Investment Risk.** The underlying ETF is not actively managed, and the fund manager does not take defensive positions under any market conditions, including declining markets.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the underlying ETF, and none of those Authorized Participants is obligated to engage in creation and/or redemption transactions. The underlying ETF has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the underlying ETF and no other Authorized Participant is able to step forward to create or redeem, shares in the underlying ETF may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting.
- **Tracking Error Risk.** The underlying ETF may be subject to tracking error, which is the divergence of its performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the ETF portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security's price at the local market close and the ETF's valuation of a security at the time of calculation of the Fund's NAV), transaction costs incurred by the ETF, the holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, acceptance of custom baskets, changes to the Underlying Index or the costs to the ETF of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the ETF incurs fees and expenses, while the Underlying Index does not.

### Risks associated with Debt/Money Markets Instruments

#### Interest Rate Risk

As with debt/money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

#### Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

#### Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

### Risks associated with Segregated Portfolio

## TATA NIFTY INDIA DIGITAL ETF FUND OF FUND

Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.

Security comprises of segregated portfolio may not realize any value.

Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

### **Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:**

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

### **Risks associated with transaction in Units through stock exchange(s)**

In respect of transaction in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

### **Risk associated with potential change in Tax structure**

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

### **Risk Control / Mitigation measures for equity investments and related investments:**

The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risks and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in corporate securities market is higher compared to those of government securities. The liquidity risk in corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators to increase the liquidity and transparency such as introduction of repo in corporate bonds, Credit Default Swaps, compulsory reporting of secondary market OTC transactions on exchange platforms to name a few. Moreover, the recent successful introduction of Interest Rate Future in the benchmark 10 year Government Bond will also likely to increase the depth in the debt market.

The market participants in the corporate debt and gilt markets are banks, financial institutions, mutual funds, corporates, insurance companies, FIs, primary dealers and provident funds. - Foreign Portfolio Investor (Foreign Portfolio Investor (FPI) as defined under Regulation 2(1)(h) of Security Exchange Board of India (Foreign Portfolio Investors) Regulations, 2014.
- International Multilateral Agencies approved by the Government of India.

**Compliance under Foreign Account Tax Compliance Act (FATCA) regulations:**

United States of America (US) has introduced chapter no. 4 in the US Internal Revenue Code as a part of the Hiring Incentives to Restore Employment (HIRE) Act, which was enacted by the US legislature to create employment opportunities in US. The HIRE Act includes Foreign Account Tax Compliance Act (FATCA), which now forms a part of the US-IR Code. The regulations for FATCA have undergone revision since 2010 and the final regulations make the FATCA provisions effective from July 1, 2014.

The objective of FATCA is to detect "US Persons", who evade US taxes by using financial account maintained outside US. The US persons are defined as those who have either US citizenship or US residency. The FATCA stipulates reporting on -

- i. US taxpayers about certain foreign financial accounts and offshore assets.
- ii. Foreign Financial Institutions (FFIs) about financial accounts with them of US taxpayers or foreign entities in which US taxpayers hold substantial ownership interest.

FFIs (including mutual funds in India) are required to periodically report information on accounts of US persons, who maintain balances above a threshold. In the event of a default in the reporting of information on accounts of US taxpayers, a withholding of 30% of the payment made from US sources will be imposed on the recalcitrant account holders and non-participating Financial Institutions. SEBI vide its circular no. CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. Tata Asset Management Company Limited (TAML) is classified as a Foreign Financial Institution (FFI) under the FATCA provisions and in accordance therewith, the AMC would be required to comply with the rules & regulations of FATCA, from time to time.

In order to ensure compliance with FATCA and other rules / directions / notifications as may be issued by Government of India or other regulatory authority, Mutual Funds are required to institute a process to identify US Person investors and report the same.

Applicants are required to refer to the "FATCA information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.

**Common Reporting Standard (CRS):**

On similar lines of FATCA, the Organization of Economic Development (OECD), along with the G 20 countries, of which India is a member, has released a 'Standard for Automatic Exchange of Financial Account Information in Tax matters'. In order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, the G 20 & OECD countries have together developed a common reporting standard (CRS) on automatic exchange of information (AEOI). On June 3, 2015 India has joined the Multilateral Competent Authority Agreement (MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the 'source' jurisdiction to collect and report information to their tax authorities about account holders 'resident' in other countries. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest in the 'resident' countries.

In view of India's commitment to implement the CRS on AEOI and also the IGA with USA and with a view to provide information to other countries necessary legislative changes has already been made in Finance Act & by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the reportable accounts.

Applicants are required to refer to the "FATCA/CRS information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.

With the change in guidelines, investors may be called for additional information required by the law. Investors are requested to keep Mutual Fund updated with change in information already submitted by them with Mutual Fund. FATCA provisions are relevant not only at on-boarding stage of investor(s)/unit holder(s) but also throughout the life cycle of investment with the Fund/the AMC. In view of this, Investors should immediately intimate to the Fund/the AMC, in case of any change in their status with respect to FATCA/CRS related declaration provided by them previously.

Investors(s)/Unit holder(s) should consult their own tax advisors to understand the implications of FATCA/CRS provisions /requirements.

With the change in guidelines, investors may be called for additional information required by the law. Investors are requested to keep Mutual Fund updated with change in information already submitted by them with Mutual Fund.
