KEY INFORMATION MEMORANDUM

TATA mutual fund

TATA

NIFTY500 MULTICAP INFRASTRUCTURE 50:30:20 INDEX FUND

(An open-ended scheme replicating/tracking Nifty500 Multicap Infrastructure 50:30:20 Index)

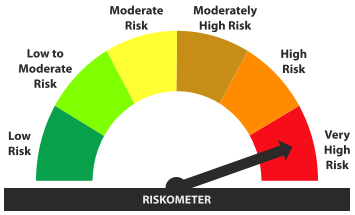

(SCHEME CODE: TATA/O/O/OIN/24/03/0067)

This product is suitable for investors who are seeking*:

- Long Term Capital Appreciation.
- Investment in equity and equity related instruments comprised in Nifty500 Multicap Infrastructure 50:30:20 Index.

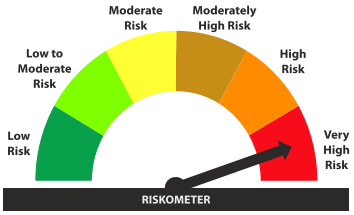

***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

Scheme Riskometer

The risk of the scheme is Very High

Benchmark Riskometer

The risk of the benchmark is Very High

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	**08.04.2024**
New Fund Offer Closed On	**22.04.2024**
Scheme Re-opened On	**30.04.2024**

Name of Mutual Fund	Name of Trustee Company	Name of Asset Management Company
Tata Mutual Fund 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051	**Tata Trustee Co. Pvt. Ltd.** 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 **CIN:** U65991-MH-1995-PTC-087722	**Tata Asset Management Pvt. Ltd.** 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 **CIN:** U65990-MH-1994-PTC-077090

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 28 November 2025

Investment Objective

The investment objective of the scheme is to provide returns, before expenses, that are in line with the performance of Nifty500 Multicap Infrastructure 50:30:20 Index (TRI), subject to tracking error.

However ,there is no assurance or guarantee that the investment objective of the scheme will be achieved. The scheme does not assure or guarantee any returns.

Asset Allocation Pattern of the scheme

Under normal circumstances, the investment range would be as follows:

Type of Instruments	Asset Allocation (% of Net Assets)	
	Minimum	Maximum
Securities covered by Nifty500 Multicap Infrastructure 50:30:20 Index	95	100
Debt & Money Market Instruments^ including units of Mutual Funds^^	0	5

^ Debt / Money Market Instruments includes instruments like but not limited to Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Short term Corporate Bonds, Repos, Short-term Government securities and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.

^^The scheme may invest in units of liquid /debt /money market mutual fund schemes of Tata Mutual Fund or in the Scheme(s) of other mutual funds in conformity with the investment objective/ asset allocation of the Scheme.

The scheme will invest in all the stocks in the same weightage that they represent in the underlying Index. A small portion of the net assets will be invested in debt and money market instruments to meet the liquidity requirements of the Scheme.

The Scheme may take an exposure to equity derivatives of constituents of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. The rebalancing in such cases will be done within the stipulated time as mentioned in 'change in investment pattern' para. The exposure of scheme in derivative instruments shall be up to 20% of the net assets of the scheme. The margin money requirement for the purposes of derivative exposure will be held in the form of Term Deposits, cash or cash equivalents or as may be allowed under the Regulations.

A part of the net assets may be invested in the triparty repo as may be permitted by RBI to meet the liquidity requirements. Securities in which investment is made for the purpose of ensuring liquidity (debt and money market instruments) are those that fall within the definition of liquid assets.

The scheme(s) will comply with the provision no. 12.24.1 of SEBI Master Circular on Mutual Fund dated June 27, 2024 which specifies that the cumulative gross exposure through equity, debt, money market instruments, mutual fund units, derivative positions, other permitted securities / assets and such other securities / assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the scheme. As per provision no. 12.25.3 of SEBI Master Circular on Mutual Fund dated June 27, 2024, cash or cash equivalents with residual maturity of less than 91 days shall not be treated as creating any exposure.

Pending deployment of funds of the Scheme in securities in terms of the investment objective of the scheme as stated above, the funds of the Scheme may be invested in short term deposits of scheduled commercial banks in accordance with provision 12.16 of SEBI Master Circular on Mutual Funds dated June 27, 2024.

The Scheme shall ensure that the underlying Index complies to the portfolio concentration norms as per provision no. 3.4 of SEBI Master Circular on Mutual Fund dated June 27, 2024.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending/ Short Selling	As per provision no. 12.11 of SEBI Master Circular on Mutual Fund dated June 27, 2024, not more than 20% of the net assets of the scheme will be deployed in securities lending & not more than 5% of the net assets of the scheme will be deployed in stock lending through a single intermediary. The Scheme will not invest in short selling.	Provision no. 12.11
2	Equity Derivatives for non-hedging Purposes	The Scheme may take an exposure to equity derivatives of constituents of the underlying	Provision no. 12.25

		index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. The rebalancing in such cases will be done within the stipulated time as mentioned in 'change in investment pattern' para. The exposure of scheme in derivative instruments shall be up to 20% of the net assets of the scheme. The margin money requirement for the purposes of derivative exposure will be held in the form of Term Deposits, cash or cash equivalents or as may be allowed under the Regulations.	
3	Securitized Debt	The Scheme will not invest in Securitized Debt	Provision no. 12.15
4	Overseas Securities	The Scheme will not invest in Overseas Securities	Provision no. 12.19
5	# ReITS and InVITS	The Scheme will not invest in ReITS and InVITS	Provision no. 12.21 & clause no. 13 of Seventh Schedule of SEBI (MF) Regulation, 1996.
6	AT1 and AT2 Bonds	The Scheme will not invest in AT1 and AT2 Bonds	Provision no. 12.2
7	Any other instrument a. Repo in corporate debt securities and corporate reverse repo, b. Unrated debt instruments c. Credit Default Swaps (CDS) d. Debt Instruments with Structured Obligation (SO) / Credit Enhancement (CE)	a) The Scheme will not invest in Repo in corporate debt securities and corporate reverse repo, b) The Scheme will not invest in Unrated debt instruments c) The Scheme will not invest in Credit Default Swaps (CDS) d) The Scheme will not invest in Debt Instruments with Structured Obligation (SO) / Credit Enhancement (CE)	Provision no. 12.18 Provision no. 12.1 Provision no. 12.28 Provision no. 12.3

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

Change in Investment Pattern/ Portfolio Rebalancing

Rebalancing due to Short Term Defensive Consideration

Being a passively managed open-ended index fund, changes in investment pattern are normally not foreseen. However, for short durations part of the corpus may remain pending for deployment, in cases of extreme market conditions, special events or corporate events etc. The Fund Manager, with the intention to protect the interests of the unit holders may change the investment pattern for short term and defensive considerations pursuant to provision no. 1.14.1.2 of SEBI Master Circular on Mutual Fund dated June 27, 2024. The same will be rebalanced within 7 Calendar Days.

Rebalancing due to Portfolio Replication

In case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

Investment Strategy	The Fund is a passively managed Index fund which will employ an investment approach designed to replicate / track the performance of the Nifty500 Multicap Infrastructure 50:30:20 Index (TRI). The Scheme seeks to achieve this goal by investing in securities constituting the Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in debt / money market instruments including units of Mutual Funds to meet the liquidity and expense requirements. **Tracking Error** Tracking error is a measure of the difference in returns from the Scheme and the returns from the index. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis. Tracking error could be the result of a variety of factors including but not limited to: • Delay in the purchase or sale of stocks within the benchmark due to: i. Illiquidity in the stock, ii. Delay in realization of sale proceeds, • The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices. • The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price. • The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. • Investment in Debt and money market instruments to meet redemption / other liquidity requirements • Addition or Removal of stocks from the index-by-index service provider • Disinvestments to meet redemptions, recurring expenses, income distribution cum capital withdrawal payouts etc. • Execution of large buy / sell orders • Transaction cost and recurring expenses • Delay in realization of Unit holders' funds • Levy of margins by exchanges The Scheme will endeavor to minimize the tracking error by: • Rebalancing of the portfolio. • Setting off incremental subscriptions against redemptions. • Use of derivatives for portfolio rebalancing and efficient portfolio management • Fast track in expediting in deployment of Cash • Maintaining low levels of Cash The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. The tracking error based on past one year rolling data shall not exceed 2%. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees. However, the Fund will endeavor to limit the tracking error within 2% limits. The Fund in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. **Tracking Difference** "Tracking Difference" is the difference of return between the fund and its respective benchmark. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. The annualized difference of daily returns between the index and the NAV of the Fund shall be disclosed on the AMCs website www.tatamutualfund.com and on website of AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units **Trading in Derivatives by the Scheme**

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc.

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may take an exposure to equity derivatives of constituents of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. Exposure to derivative instruments will be restricted to the limit as specified in the para on asset allocation pattern of the scheme

Example: Please note that below mentioned examples are purely for illustration purpose only and actual exposure may vary to a greater extend in line with the regulatory directives.

Derivative Instruments & Related Examples:

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Portfolio Rebalancing

Fund Manager may use derivatives for portfolio rebalancing of the scheme to achieve a particular desired portfolio position at a lower cost using derivatives rather than cash market transactions. Suppose market moves upward direction for a while and fund manager wants to reduce weightage of scrips which moves one sided along with the market movement. Hence, he may decide to rebalance the portfolio by buying a stock future rather than the stock itself. He may deploy a buy-and-hold strategy by selling a stock or an index portfolio today, investing the proceeds in the money market, and having a locked-in price to buy it back at a future date.

However, a fund's position in a stock -underlying and derivatives taken together - should be within the fund's maximum permissible limit in the stock. For this purpose, stock option long calls should be counted as notional value.

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium), and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

There are two basic types of options, call option and put option.

a. **Call option:** A call option gives the buyer of the option the right but not the obligation to buy a given quantity of the underlying asset, at a given price (strike price), on or before a given future date.

b. **Put option:** A put option gives the buyer of the option the right but not the obligation to sell a given quantity of the underlying asset, at a given price (strike price), on or before a given future date.

On expiry of a call option, if the market price of the underlying asset is lower than the strike price the call would expire unexercised. Likewise, if, on the expiry of put option, the market price of the underlying asset is higher than that of the strike price the put option will expire unexercised.
The buyer/holder of an option can make loss of not more than the option premium paid to the seller/writer, but the possible gain is unlimited. On the other hand, the option seller/writer's maximum gain is limited to the option premium charged by him from the buyer/holder but can make unlimited loss.

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure

Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

In Addition to the above, SEBI has also prescribed following derivative position limits:

Position Limits for Mutual Fund and its scheme:

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls, and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
	Long positions in index derivatives (long futures, long calls, and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills, and similar instruments.
Position limit for Stock Options and Stock Futures contracts	
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL). This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.	

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
   - 1% of the free float market capitalization (in terms of number of shares). Or
   - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
3. For index-based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

Risk Profile of the Scheme	Tata Nifty500 Multicap Infrastructure 50:30:20 Index Fund will be a passively managed scheme by providing exposure to Nifty500 Multicap Infrastructure 50:30:20 Index and tracking its performance, before expenses. The scheme performance may be affected by a general decline in the Indian markets relating to its underlying Index. The scheme invests in the underlying Index regardless of its investment merit.

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index, generally known as "Tracking Error" risk.

The scheme shall endeavour that the tracking error based on past one year rolling data shall not exceed 2%. However, it may so be that the actual tracking error can be higher or lower than the rate specified above. Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Index, or one or more securities covered by / included in the Index.

To the extent that some assets/ funds may be deployed in Debt/Money Market Operations, the Scheme will be subject to risks relating to such deployment / operations and may also contribute to tracking errors.

In case of investments in derivative instruments like index futures, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is an untested market.

The Scheme is subject to the principal risks described below. Some or all these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives. These risks are associated with investment in equities.

The Indices reflect the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trade may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices.

NSEIL undertakes periodic reviews of the securities that are represented in the Nifty500 Multicap Infrastructure 50:30:20 Index (TRI) and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty500 Multicap Infrastructure 50:30:20 Index (TRI) during this period.

The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.

Transaction and other expenses, such as but not limited to brokerage, custody, trustee, and investment management fees.

Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity, and volatility in security prices.

Risks associated with investments in equity instruments

Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilizing debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic, or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be able to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Settlement Risk

In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Schemes portfolio may result, at times, in potential losses to the Schemes, and there can be a subsequent decline in the value of the securities held in the respective Scheme's portfolio.

Risks associated with Passive Investments:

The Scheme is not actively managed. The underlying index may be affected by a general decline in the Indian markets. The scheme performance may be affected by a general decline in the Indian markets relating to its underlying Index. The scheme

	invests in the underlying Index regardless of its investment merit. The scheme does not attempt to individually select stocks or to take defensive positions in decliningmarkets. **Risks associated with Debt/Money Markets Instruments** **Interest Rate Risk** As with money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV. **Credit Risk** Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e., the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk. **Reinvestment Risk** This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed. **Liquidity risk:** This represents the possibility that the realised price from selling the security might be lesser than the valuation price because of illiquid market. If a large outflow from the Scheme is funded by selling some of the illiquid securities, the NAV could fall even if there is no change in interest rates. **Risks associated with Derivatives** Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio because of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates, and indices. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments". **Risks associated with Segregated Portfolio** Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprising of segregated portfolio may not realize any value. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV. **Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:** The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, if the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund. **Securities Lending by the Mutual Fund**

	The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, provision no. 12.11 of SEBI Master circular on Mutual Fund dated June 27, 2024, framework for short selling and borrowing and lending of securities, provision no. 12.11.2.1.a of SEBI Master circular on Mutual Fund dated June 27, 2024. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries. Securities Lending means the lending of securities to SEBI approved intermediaries for a a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending. Not more than 20% of the net assets of the Scheme can be deployed in stock lending . Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis. Example: A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage ofthe market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential. Thus the scenario under which the scheme would participate in stock lending would be: 1.There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months. 2.There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same.(In all cases higher than the price of the script). 3.The borrower is represented by a proper recognized intermediary. 4.The agreement is to return the security or the amount so negotiated at a particular period of time or on demand. Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances: a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time. b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns. c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme. **Securities Lending Risks** It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned **Tracking Error Risk:** The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index, non-availability of issuances, regulatory policies and any such reasons that may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Difference" is the difference of return between the fund and its respective benchmark. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking difference /Tracking Error may arise including but not limited to the following reasons: - i) Expenditure incurred by the fund.

ii) The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be always invested as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.

iii) Securities trading may halt temporarily due to circuit filters.

iv) corporate actions such as debenture or warrant conversion, merger, change in constituents, etc.

v) Disinvestments to meet redemptions, recurring expenses, etc.

vi) Execution of large buy / sell orders

vii) Transaction cost (including taxes and insurance premium) and recurring expenses

viii) Realization of Unit holders' funds

The tracking error i.e. the annualized standard deviation of the difference in daily returns between the underlying index or goods and the NAV of the Scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees. However, the Fund will endeavor to limit the tracking error within 2% limits. The Fund existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Risks associated with investment in units of mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

Liquidity risk – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with provision 1.12 of SEBI Master Circular on Mutual Funds dated June 27, 2024.

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

Default risk - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Investors are advised to consult their own tax advisors with respect to the specific tax and other implications arising out of their participation in the scheme prior to making any transaction.

Risks Factors associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control

Risk Control / Mitigation Strategies:

Nifty500 Multicap Infrastructure 50:30:20 Index is an index where there will be concentration of securities which are part of Infrastructure theme. The scheme is subject to the risks associated with such securities forming part of this index. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity Securities. Such risks may impact the Scheme to the extent that it invests securities forming part of this index. As the fund is passive in nature, there could not be any active risk control / mitigation strategies implemented by the fund manager.

C. Risk mitigation strategies

Risk Control / Mitigation measures for Equity & Equity related instruments:

Nature of Risk	Mitigation Measures
Liquidity Risk	Market risk is a risk inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index.

Concentration / Sector Risk	Index Fund being a passive and portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions.
Interest Rate Risk	Scheme being passively managed fund will invest substantially in in the constitutes of underlying index in the same proportion. Liquidity risk is likely to be lower. The scheme will endeavor to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.

Risk Control / Mitigation measures for Debt and related Investments portion/allocation:

Nature of Risk	**Mitigation Measures**
Liquidity Risk	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. The Scheme may, however, endeavor to minimize liquidity risk by investing the debt portion of the portfolio in relatively liquid short-term money market instruments, units of money market / liquid schemes.
Credit Risk	In house dedicated team for credit appraisal Focus on good quality paper at the time of portfolio construction Management analysis will be used to identify company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken
Price-Risk or Interest Rate Risk	Close watch on the market events Active duration management, focus will be on investing in lower duration debt instruments The Scheme may invest the debt portion of the portfolio in money market instruments, units of money market / liquid schemes thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.
Risk of Rating Migration	The Scheme may invest the debt portion of the portfolio in short-term money market instruments, units of money market / liquid schemes thereby mitigating the risk of rating migration generally associated with long-term securities
Spread Risk	The Scheme may invest the debt portion of the portfolio in short-term money market instruments, units of money market / liquid schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities
Reinvestment Risk	The debt allocation of the scheme is cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

The measures mentioned above is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Plans/Options	The Scheme has the following Plans across a common portfolio: **Regular Plan**: This Plan is for investors who wish to route their investment through any distributor. **Direct Plan:** This Plan is only for investors who purchase /subscribe units in a scheme directly with the Fund and is not

available for investors who route their investments through a Distributor.

Both the Plans under the Scheme offer Growth & Income Distribution cum capital withdrawal Option. Income Distribution cum capital withdrawal option under each Plan further offers of choice of Payout of Income Distribution cum capital withdrawal Option, Reinvestment of Income Distribution cum capital withdrawal Option.

Compulsory Reinvestment of Income distribution cum Capital Withdrawal:

To reduce the expenses of the scheme and for the convenience of the investors/- the income distribution cum capital withdrawal shall be compulsorily reinvested (for investors of non-electronic mode) within the scheme at the applicable ex-dividend NAV if the payout amount is lower than or equal to Rs. 100/- in the same option of the respective plans of the scheme at the ex- dividend rate.

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution cum capital withdrawal. Hence payout amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Please note that the income distribution cum capital withdrawal shall be distributed at the discretion of the Trustees subject to availability of distributable surplus.

Investors subscribing under Direct Plan of a Scheme will have to indicate "Direct Plan" against the scheme name in the application form e.g., "Tata Nifty500 Multicap Infrastructure 50:30:20 Index Fund"

Default Option: Investor should appropriately tick the 'option' (Growth or Income distribution cum capital withdrawal) in the application form while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Direct Plan- Growth Option. If no sub-option for Income distribution cum capital withdrawal option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Reinvestment of Income Distribution cum capital withdrawal option.

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the scheme.

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

Applicable NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in :Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.

	<table><tr><td>Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.</td><td>The closing NAV of the next Business Day.</td></tr><tr><td>Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on that Business Day.</td><td>The closing NAV of such subsequent Business Day on which funds are available for utilisation.</td></tr></table> In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day. In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised /available for utilisation on the next business day. **For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:** For determining the applicable NAV, the following shall be ensured: • Application for switch-in is received before the applicable cut-off time. • Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time. • In case of switch/STP transactions, funds will be made available for utilization in the switch-in-scheme based on the redemption payout cycle of the switch out scheme. For investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme irrespective of the installment date of the SIP, STP or record date of income distribution cum capital withdrawal etc. **Redemption /Switch Out**: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day. Outstation cheques/demand drafts will not be accepted. **Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.**
Minimum Application Amount/ Number of Units	**Minimum subscription amount** Rs 5,000/- and in multiple of Re.1/- thereafter. There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme. **Minimum Additional Purchase Amount** Rs.1,000/- and in multiples of Re.1/- thereafter. Portfolio Turnover Rate particularly for equity-oriented schemes

"Portfolio Turnover" is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Fund's portfolio during the given period of time. As the scheme is an open ended equity scheme, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrate opportunities that exist for scrips/securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

Portfolio Turnover Ratio: 0.57 Times as on 30th September, 2025 (for 13 months)

</td></tr>
<tr><td>Expenses of the Scheme

Recurring expenses</td><td>

New Fund Offer Period & Continuous Offer

Exit load:

Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor)

Exit load:

0.25 % of the applicable NAV, if redeemed on or before 15 days from the date of allotment

Goods & Service Tax on exit load, if any, will be paid out of the exit load proceeds and exit load net of Goods & Service Tax, if any, will be credited to the scheme.

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme with effect from April 23, 2025.

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 1.00 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Actual expenses for the previous financial year:

<table>

Email: service@tataamc.com (Tata Mutual Fund Email Address), Telephone (022) 6282 7777 (Monday to Saturday 9:00am to 5:30pm).
Unitholders' Information	**Account Statement** The AMC will send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days of receipt of valid application/transaction to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form). A Consolidated Account Statement (CAS) detailing all the transactions across all mutual funds (including transaction charges paid to the distributor) and holding at the end of the month shall be sent to the Unit holders in whose folio(s) transaction(s) have taken place during the month by mail or email on or before 15th of the succeeding month. Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable As per SEBI Circular no SEBI/HO/MRD/PoD1/CIR/P/2025/16 dated February 14, 2025, the following timelines will be applicable for sending of CAS with effect from May 14th, 2025: 1. The CAS shall be dispatched to investors who have opted for delivery via electronic mode, within twelve (12) days from the month end and to investors who have opted for delivery via physical mode, within fifteen (15) days from the month end. 2. If there is any transaction in any of the demat accounts of the investor or in any of his mutual fund folios, then CAS shall be sent to that investor through email on monthly basis. In case there is no transaction in any of the mutual fund and demat accounts then CAS with holding details shall be sent to the investors by email on half yearly basis. In such cases, the CAS shall be dispatched to those investors who have opted for delivery via electronic mode, on or before the eighteenth (18th) day of April and October and to investors who have opted for delivery via physical mode, on or before the twenty-first (21st) day of April and October. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered with the Depositories and the AMCs/MF-RTAs. For further details, refer SAI.

Portfolio Disclosure:

Tata Mutual Fund shall disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year.

In case of unitholders whose email addresses are registered, Tata Mutual Fund will send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Tata Mutual Fund will publish an advertisement every half-year, in all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the half yearly statement of the schemes portfolio on the AMC's website www.tatamutualfund.com and on the website of AMFI (www.amfiindia.com). Tata Mutual Fund will provide physical copy of the statement of scheme portfolio without any cost, on specific request received from a unitholder.

For portfolio disclosure of schemes of Tata Mutual Fund, kindly visit functional Weblink: https://www.tatamutualfund.com/schemes-related.

Unaudited Financial Results:

Tata Mutual Fund/ Tata Asset Management Pvt Ltd shall within one month from the close of each half year, that is on 31st March & on 30th September, host a soft copy of its unaudited financial results on its website in the format specified in Twelfth Schedule of SEBI(Mutual Funds) Regulations 1996.

Tata Mutual Fund / Tata Asset Management Pvt Ltd shall publish an advertisement disclosing the hosting of such financial results on their website, in atleast one English daily newspaper having nationwide circulation & in a newspaper having wide circulation published in the language of the region where the Head Office of the fund is situated.

For Unaudited Financial Results of Tata Mutual Fund, kindly visit functional Weblink: https://www.tatamutualfund.com/about-us.

Annual report

Annual report or Abridged Summary, in the format prescribed by SEBI, will be hosted on AMC's website, functional Weblink: https://www.tatamutualfund.com/about-us and on the website of AMFI www.amfiindia.com.

The scheme wise annual report or an abridged summary thereof, in the format prescribed, shall be sent by way of e-mail to the investor's registered e-mail address not later than four months from the date of closure of the relevant accounts year.

Investors who have not registered their email id, will have an option of receiving a physical copy of the Annual Report or Abridged Summary thereof.

Tata Mutual Fund will provide a physical copy of the abridged summary of the Annual Report, without charging any cost, on specific request received from a unitholder. Physical copies of the report will also be available to the unitholders at the registered offices at all times.

Tata Mutual Fund will publish an advertisement every year, in the all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the scheme wise annual report on the AMC website and on the website of AMFI.
